**PRODUCT INFORMATION**

**APPLICATION**

Safety cables are used in all situations that require special protection against fire and flame damage for people and equipment and where a high degree of safety conditions must be fulfilled. Suitable for indoor applications. For outdoor applications, protection must be provided against exposure to direct sunlight. The cable should only be laid directly in earth or water if a protective conduit is used. These cables correspond to the demands of System Circuit integrity E30 in accordance with DIN 4102-12. System Circuit integrity is guaranteed at an operating voltage up to 110V. Permitted operating temperature at conductor +70°C.
