

Floor Box Inserts

Floor Box Inserts

Applications:

Floor boxes are floor mounted outlets that can be configured in a variety of ways.

As a rule the following unit inserts will be used:

Rectangularly = GES 9 resp. GES 6

Round = GESR 9 resp. GESR 6

Capacity of the adapter plates:

GES 6 / GESR 6 = max. 3 floor box inserts 2-ports

GES 9 / GESR 9 = max. 3 floor box inserts 3-ports

Advantages:

- Floor Box Inserts can be installed directly (without a device cup) in the corresponding floor box (third party manufacturer)
- floor voids are used to maximise cabling capacity to each floor
- optimal assembly ratios for copper and fibre cables
- space for 3 unilan® modules in each insert
- corresponding adapter plates for the different module options are available

Floor Box Inserts for adapter plates:

Examples:

GES 6 / GES 9

GESR 6 / GESR 9

Floor Box Inserts
