Welcome

Dear valued partner,

Welcome to the new FibreFab catalogue, produced exclusively for you. The creation and development of this catalogue underlines our continued investment and commitment to our partners.

Based in Milton Keynes (UK), FibreFab has, over the last 7 years, grown to become one of the strongest manufacturing partners for fibre optic communications solutions, anywhere in mainland Europe.

Quality, value, flexibility, responsiveness, and a relationship strategy that rewards and encourages long term partnerships, have become the mainstay of our business. This strategy has enabled FibreFab to develop and grow its product portfolio to unrivalled levels which now form a broad and extensive range of Data and Telecommunications solutions.

Unabated, FibreFab has continued to invest in its production capabilities over the last 5 years and combined with key acquisitions, we can now boast a state-of-the-art fibre optic manufacturing facility in the UK, with further production capabilities spread over 2 continents. These have the capability to serve our partners with a next day service in most regions of the world. We are one of only a handful of manufacturers in mainland Europe of quality MTP® solutions fully accredited by US Conec, this underlines our ability to deliver even the most technically challenging optical solutions.

- Pre-Terminated Cable
- MTP®/MPO Solutions
- Non Standard Assemblies (Patchcords and Pigtails)
- Pre Loaded Panels

We look forward to hearing from you,

John Grillo
Chairman

FibreFab

Fibre Optic & Networking Products

OPTRONICS

FibreFab is a manufacturer of fibre optic products, for use in local or wide area networking and telecommunications applications.

Based in Milton Keynes, UK, we have the facilities to support a vast array of customers; from the small distributor, supporting specialist installers; to a major OEM.

In 1994 FibreFab acquired Optronics, a company with over 20 years previous experience in the fibre optic manufacturing industry. The Optronics range includes patchcords, pigtailed (multimode and singlemode), patch panels, wall and splice boxes (unloaded or customised), and a full range of accessories.

Optronics products are available directly from FibreFab or from our distributors all over the world.

FibreFab's range and capabilities are constantly being expanded and updated, allowing us to supply OEM products, specifically designed to your own specifications.

Optical Fibre Assemblies

At Fibrefab we understand the importance of every part of an optical network. Our fibre optic patchcords are manufactured and tested to demanding standards and specifications. The result of this is a high quality, high performance product.

Due to the increasing requirement for high bandwidth applications, patchcords are becoming a critical part of network infrastructure.

Each patchcord is tested for insertion loss and return loss (singlemode only) by one of our technicians. The patchcord is shipped with its own test certificate and all test data is fully traceable.

We produce patchcords in multimode OM1, OM2, OM3 and OM3+ and singlemode G.652D, G.655 and G.657A/B. Our extensive stock of patchcords are in available standard lengths of 1,2,3,5,10,15,20,25 and 30 meters.

If you have special requirements for patchcords and cable assemblies, we have a rapid turnaround engineering and manufacturing service that allows us to assist you in the design and manufacture of your custom products. With our manufacturing facilities in Europe and Asia, we are able to support quick turn, high volume orders.

Patchcords

Simplex Patchcords - Singlemode

Diagram & Cable Cross Section

Features & Specification

- ▶ Available in SC, ST, FC, LC, E2000 & MU connector styles.
- ▶ Low insertion loss (<0.3dB) & high return loss (>50dB).
- ▶ RoHS compliant.
- ▶ Standard product manufactured on 2.8mm (nominal dia.) LSZH zip cable.
- ▶ Also available in 2mm (nominal dia.) cable.
- ▶ Individual test sheet and unique product identification number for traceability.

TEST	METHOD	SPECIFICATION

FibreFab fibre cable assemblies are designed and manufactured in FibreFab's ISO9001 certified facilities, the product range covers both singlemode and multimode patchcords and pigtails.

Assemblies available in all major connector types.

We maintain a standard stock of singlemode and multimode patchcords: 1,2,3,5 and 10 metre lengths, 9/125µm, 50/125µm and 62.5/125 µm, and enhanced (10Gigabit) OM3 specifications.

Other cable types are available upon request.

Optical Fibre Assemblies

Patchcords

Duplex Patchcords – Singlemode APC

OS1 APC

Diagram & Cable Cross Section

Features & Specification

- ▶ Available in SC, FC, LC & E2000 connector styles.
- ▶ Low insertion loss (<0.3dB) & high return loss (>60dB).
- ▶ RoHS compliant.
- ▶ Standard product manufactured on 2.8mm (nominal dia.) LSZH zip cable. Also available in 2mm (nominal dia.) cable.
- ▶ Individual test sheet and unique product identification number for traceability.

TEST	METHOD	SPECIFICATION

Patchcords

Duplex Patchcords – Multimode

OM3

Diagram & Cable Cross Section

- We maintain a standard stock of patchcords in 1,2,3,5 and 10 metre lengths.
- Standard cable colour: Purple.
- Other colours available on request: Orange, Yellow, Blue, Green, and Red.

Features & Specification

- ▶ Available in SC, ST, FC, LC, E2000 & MU connector styles.
- ▶ Low insertion loss (<0.3dB).
- ▶ RoHS Compliant.
- ▶ Used in 10GbE, ethernet & fast ethernet and FDDI networks.
- ▶ 850nm VCSEL based GbE (1000 base-SX) to support longer distance.
- ▶ Standard product manufactured on 2.8mm (nominal dia.) LSZH zip cable. Also available in 2mm (nominal dia.) cable.
- ▶ Meets international reliability standards.
- ▶ Individual test sheet and unique product identification number for traceability.

Optical Fibre Assemblies

Specific Optical Patchcords

Attenuated Patchcords

Optronics attenuated patchcords are used to attenuate the optical signal in a link. Attenuated patchcords can be installed in place of conventional patchcords to provide a constant level of attenuation with a return loss of >50 dB.

The attenuated patchcord can be used to replace the conventional cable assembly and attenuator combination. It is a compact, multi-purpose, passive device designed to operate at wavelengths of 1310 and 1550nm.

Attenuated patchcords can be provided with LC, SC, ST and FC connector styles as per customer requirements.

Optronics attenuated patchcords come to you from a world-class manufacturing facility backed by 20 years of experience in manufacturing passive and active fibre optic devices.

Features

- ▶ Provides the functions of attenuator and cable assembly, simultaneously
- ▶ Low back reflection
- ▶ 100% insertion loss testing
- ▶ Connector varieties available
- ▶ Conforms to the requirements of EIA/TIA standards
- ▶ Inexpensive and compact

Applications

- ▶ Telecommunication Networks
- ▶ CATV
- ▶ LAN and WAN
- ▶ Attenuation values available
01= 1dB, 02= 2dB, 03= 3dB, 04= 4dB, 05= 5dB
06= 6dB, 07= 7dB, 08= 8dB, 09= 9dB, 10= 10dB
15= 15dB, 20= 20dB

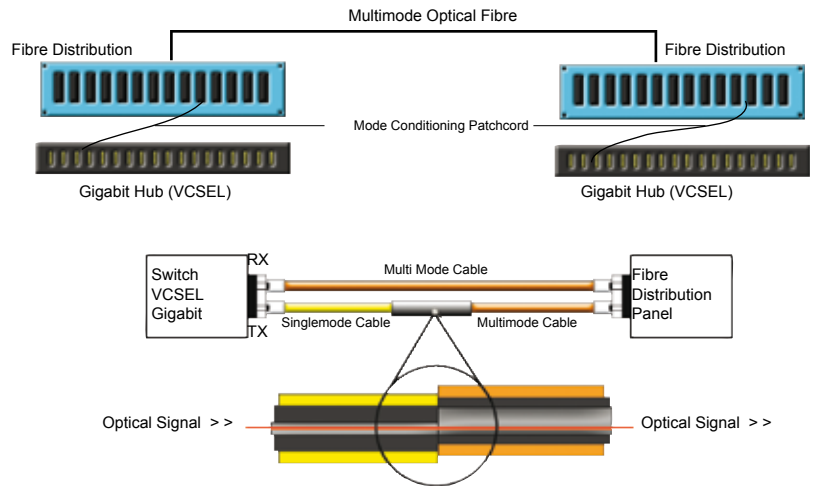

Optical Fibre Assemblies

Specific Optical Patchcords

Mode Conditioning Patchcords

Mode Conditioning Principle

Multimode optical fibre links that use laser based transmitters may be limited in bandwidth to values less than half those of the over-filled launch bandwidth.

Mode conditioning patchcords are designed to allow use of VCSEL laser transmitters in 62.5/125 (OM1) or 50/125 (OM2) multimode fibre optic cabling systems. These assemblies allow long wavelength 1300nm signals to be transmitted, over good quality fibre, at distances of up to 550m.

VCSEL devices used in gigabit ethernet applications result in a singlemode launch condition, and operate over both singlemode and multimode fibre. Differential Mode Delay (DMD) occurs when the transmitter device launches a singlemode laser signal into the centre of the multimode fibre, resulting in the transmission of multiple signals. Such signals confuse the receiver, with resultant limitations on the operating bandwidth and especially the drive distances of gigabit ethernet.

The 62.5/125 fibre will typically only allow a distance of 220-270m for gigabit ethernet, using lower cost lasers operating at the 850nm range. Longer distance requirements can be met by the use of 1300nm electronics in conjunction with a mode conditioning launch lead. The Optronics mode conditioning cable assembly, eliminates differential mode delay by moving the singlemode launch to an offset position, increasing the mode fill and reducing DMD.

Description

	Multimode	
	62.5/125	50/125
Operating Wavelength	1300nm	
Maximum Insertion Loss:	0.5dB	
Coupled Power Ratio (CPR):	28 to 40dB	12 to 20dB
Back Reflection:	S/M Channel: -30dB M/M Channel: -20dB	
Connector Finish	PC or APC	
Sheath Colour	Orange (yellow for SM leg)	

Connectors available

Types: FC, FC/APC, ST, SC, SC/APC, LC, MTRJ, MU
Length: 2m ± 10mm (Other lengths available to order)

Product Packaging

Each patchcord is individually packaged and identified for traceability, a test certificate is supplied for each assembly.

Optical Fibre Assemblies

Pre-Terminated Assemblies

Your network is the heartbeat of your organisation. Cabling infrastructure now has to be designed to deliver mission-critical applications to a converged network that demands reliability, speed and availability. A factory terminated fibre optic cabling solution is a simple, scalable, and reliable method of deployment. Installation time, compared to traditional copper cabling systems, can be greatly reduced.

A pre-terminated optical cable can offer speed and flexibility when it comes to adding to your existing network. We provide pre-terminated cables to suit a variety of installations, whether it is inside a building, across a campus or as a link between equipment in a data centre or comms room. We have the solution!

Our pre-terminated cable solutions are manufactured in our quality controlled manufacturing facility, using state-of-the-art processes and equipment. We also understand that in order to produce a high quality finished product you need high quality components; that's why we only use cable and connectors sourced from our own specialist manufacturers. This means we can guarantee $<0.3\text{dB}$ insertion loss on all of our pre-terms.

Pre-terms of a cable length less than 50 metres are supplied in a protective bag.

Pre-terms of a cable length in excess of 50 metres are supplied on a drum.

Protection sleeve and pulling eye can be changed on request.

Optical Fibre Assemblies

Pre-Terminated Assemblies

Standard configuration:

- ▶ Pre-terminated assemblies are supplied as standard with protection sleeve, pulling eye and staggered distribution.
- ▶ Alternative labelling options are available. Please contact us with your requirements.
- ▶ Assemblies are identified by a serial number.

FirstLight PreTerm Options

Option 1. First Light Basic

Low cost for short runs. Can be used with optional pulling sock (sold separately).

Option 2. First Light Classic

Ideal application for inter connection between comms cabinets, where pulling protection is required to aid installation.

Option 3. First Light Breakout

Suited to applications that inter connect between patch panels and active equipment and where a ruggedised tail is required.

Option 4. First Light Prime

Suited to internal and external applications and utilising a new design of cable and breakout module we are able to offer up to 1000N of tensile strength in addition to superior crush resistance and optical performance.

Option 5. First Light High Density

Utilising MTP technology, a complete solution for rapid deployment of Data Centre high density cabling systems.

Modular Sliding Tray Patch Panels

Modular Patch Panels and modules

The MTP®/MPO cabling solution from FibreFab is the answer to cabling the data centre environment. Utilising the high-performance MTP®/MPO style connectivity, FibreFab is able to design, manufacture and test a full range of MTP®/MPO assemblies. The MTP®/MPO style plugs have introduced a new benchmark for high quality and performance into the MPO market. The connector complies with both IEC-61754-7 and TIA/EIA-604-5 standards, is fully backward compatible with previous versions of the MPO connector, and it features these unique enhancements:

- A floating ferrule allowing greater mechanical durability during mating and preventing damage caused by side load.
- Elliptical guide pin tips providing greater durability by decreasing guide pin hole wear and tear.
- Easy identification of fibre type with simple colour code.

These features deliver a higher level of reliability and a reduction of potential downtime.

3 Step Implementation

1. The system design

The system needs to be designed with consideration to the number of fibres required and the type of connectors used on the active equipment. Where SC connectors are required, the maximum number of connections using the modular patch panel is 36, but with LC and MTRJ connectors the same panel can support 72 fibres. Where lower patch panel density is acceptable, the standard sliding tray patch panel can be used.

2. The site survey

The installer is required to accurately measure the route in which the MTP®/MPO assembly will be installed, allowing an extra 10% for cable slack, and 3 metres each end for termination and management of the cables within the communication cabinet.

3. The installation

The MTP®/MPO assembly is laid into position and loosely secured to the cable tray or supports with no bends smaller than 5cm radius. When pulling any optical fibre assembly into a building, the maximum pulling force MUST be adhered to, excess force will damage the cable and the fibres within. Carefully loop any spare cable under or within the communications cabinet allowing for a stress free run to the rear of the patch panel. Dust is the enemy of all optical fibre systems, so the dust caps MUST be left on the MTP®/MPO assemblies until final connection. When the system is fully installed remove the dust caps and immediately connect to the MTP®/MPO fan-out or module.

MTP is a registered EC trademark of US Conec Ltd

MTP®/MPO Patch Panels; ST, LC, SC, MT-RJ & FC

MTP®/MPO Patch panels; ST, LC, SC, MT-RJ & FC
Patch panel pre-loaded for MTP®/MPO

Black sliding tray patch panel pre-loaded for 24 ST, SC & FC and 48 LC or MTRJ connections to MTP®/MPO systems.

MTP®/MPO Module

MTP®/MPO 12 ports SC module
Black module pre-wired for 12 SC OM3 connections.
Designed to fit modular sliding tray panel.
Ref : MTPM12SCOM3CASS

MTP®/MPO 24 port LC module
Black module pre-wired for 24 LC OM3 connections via two MTP®/MPO connections. Designed to fit modular sliding tray panel.
Part Number : MTPM24LCOM3CASS

Modular Patch Panel

19" 1U Black sliding tray patch panel for 3 modules.
Supports up to 36 SC connections with 3 MTP®/MPO links or 72 MTRJ / LC connections with 6 MTP®/MPO links.

Part Number : S13XXX00

MTP®/MPO Ruggedised fan-out

MTP®/MPO fan-out designed with special rugged cable to withstand direct connections within the communications cabinet.

Available in SC, ST, FC, LC & MTRJ terminations.

12 way MTP®/MPO to 12 SC, 50/125 OM3

Part Number: MTPM12SCOM3DF1A

12 way MTP®/MPO to 12 LC, 50/125 OM3

Part Number: MTPM12LCOM3DF1A

MTP®/MPO fan-out

MTP®/MPO fan-out for use inside patch panels and wall boxes.
Available in SC, ST, FC, LC & MTRJ terminations.

12 way MTP®/MPO to 12 SC, 50/125, OM3

Part No.: MTPM12SCOM3SF1

12 way MTP®/MPO to 12 LC, 50/125, OM3

Part No.: MTPM12LCOM3SF1

Optical Fibre Components

Connectors

SC connector

The SC connector comprises a polymer body with a ceramic ferrule/spring/crimp barrel assembly plus a crimp-over sleeve and rubber boot. These connectors are suitable for 900µm, 2mm and 2.8mm cables. The connector is precision made to demanding specifications.

The combination of a ceramic ferrule with a precision polymer housing provides consistent, long-term mechanical and optical performance.

The SC connector is a push-pull type connector that gives an audible click when mated into its adapter. The SC connector can also be tuned in 4 positions to provide the lowest insertion loss.

Optical Performance

Singlemode

Insertion loss: Max. 0.3dB Typical 0.2dB

Return Loss: UPC > 50dB Typical 55dB
APC > 60dB Typical 65dB

Multimode

Insertion loss: Max. 0.3dB Typical 0.2dB

(IEC 61300 - 3 - 4)

Intermateability

Optically and mechanically compatible with all equivalent connectors.

(Compliant with IEC 61754-4)

Mechanical

Ferrule ID / tolerance:

Singlemode - 126 +1/-0mm

Multimode - 126 -0/+2µm

Ferrule Diameter : 2.5 ± 0.001mm (MM) / 2.4990 ± 0.0005 (SM)

Pre-radiused, PC-end finish for Physical Contact ferrule to ferrule.

R 10 to 25mm

Tensile Strength Cable retention: >50N
(2 & 3mm boot versions only)

Temperature Cycle:

(61300-2-18)
-40 to +75°C, 40 cycles
<0.2dB Change

High Temperature:

(61300-2-18)
70°C for 96 hours
< 0.2dB Change

Damp Heat:

(61300-2-19)
40°C at 93% RH, 96 hours

Optical Fibre Components

Connectors

ST Connector

The ST connector has been the main stay of optical fibre connectors for many years. It can be found in almost every communications room worldwide, but is used mainly in data communications systems. The simple to use bayonet locking mechanism reduces the risks of accidental disconnection of fibre connections.

The Optronics ST optical fibre connector is comprised of a nickel plated brass body and a ceramic ferrule/spring/crimp barrel assembly, plus a crimp-over sleeve with rubber boot. These connectors are suitable for 900µm, 2mm and 3mm cables. The connector is precision made and manufactured to demanding specifications. The combination of a ceramic ferrule with precision metal housing provides consistent, long-term mechanical and optical performance.

Optical Fibre Components

Connectors

FC connector

The FC connector is used extensively in the telecommunications market, where long singlemode optical fibre cables can run upwards of 50km. In these extreme situations, the connector needs to have very low losses and accurate geometry.

The Optronics FC connector has a screw thread fitting into the adapter to provide a secure connection. The FC connector is comprised of a nickel plated brass body and a ceramic ferrule/spring/crimp barrel assembly plus a crimp-over sleeve and rubber boot. These connectors are suitable for 900µm, 2mm and 3mm cable. The connector is precision made and manufactured to demanding specifications. The combination of a ceramic ferrule with precision nickel plated brass housing provides consistent, long-term mechanical and optical performance.

Optical Fibre Components

Connectors

LC Connectors

The LC connector was the first small form factor (SFF) connector on the market. The LC features a latched lever mechanism to provide secure mating into the adapter. The LC has been designed to meet the need for a small optical fibre connector that uses half the space of the SC connector. The duplex version, which is two simplex connectors with a clip, plugs into an adapter with the same footprint as the SC connector.

The Optronics LC optical fibre comprises of a polymer body and a ceramic ferrule/spring/crimp barrel assembly plus a crimp over sleeve and rubber boot. These connectors are suitable for 900µm, 2mm and 3mm cables. The connector is precision made and manufactured to demanding specifications. The combination of a ceramic ferrule with polymer housing provides consistent, long-term mechanical and optical performance. The LC connector is available in singlemode UPC and APC versions as well as multimode.

Optical Performance

Singlemode

Insertion loss: Max. 0.3dB Typical 0.2dB

Connectors

MTRJ Connector

The MTRJ connector is a development of the now legendary MT ferrule. This amazing technology is at the heart of many state-of-the-art connectors. The MT ferrule in its various designs, has the ability to connect anything from 2 fibres in the MTRJ connector, to 72 fibres in the latest versions of the MPO connector.

The Optronics version of the MTRJ, is capable of terminating any 125µm fibre. The flexibility of the connector allows it to be used in short run local area networks in addition to longer haul cabling using singlemode fibre.

It is designed to terminate two fibres within a single connector, reducing the risk of operator error when inter-connecting equipment and distribution panels. The MTRJ has been deliberately designed to look and feel like the industry standard copper connector.

The high-density MTRJ connector allows the termination of high fibre count backbone cables into smaller distribution panels.

Description

The MTRJ connector is a high-density small form factor (SFF) connector, designed to reduce the space required in the distribution cabinets.

FibreFab has a full range of tools and products to assist you with the termination of the MTRJ connector. For those who prefer to purchase pre-terminated pigtailed, FibreFab can supply all your needs.

For information on the full range FibreFab MTRJ products and tooling please contact us for a data sheet.

Specifications

Fibre Type:
9/125 µm singlemode
50/125 µm multimode
62.5/125 µm multimode

Fibre Count available: 2

Insertion Loss (With master plug)
Standard Loss: < 0.5 dB
Low Loss: < 0.35 dB

Return Loss: =45dB (SM only)

Cable Type: Mini Zip

Adapter Bulkhead:
Single connector-Duplex

Intermateability:
Optically and mechanically compatible with all equivalent connectors.
Compliant with IEC 61754-18.

Product Packaging
Connector in kit form, packaged in 100pcs

Temperature Cycling:
(61300-2-18)
-40 to +75°C, 40 cycles
< 0.2dB Change

High Temperature:

< 0.2dB Change

Vibration (Mated Pair):
(61300-2-1)
10-55 Hz, 1.5mm P to P
< 0.2dB Change

Mating Durability:
(61300-2-2)
500 mating cycles
Clean every 25
< 0.2 dB Change

Operating Temperature:
-40°C to +85°C

Optical Fibre Components

Connectors

MTP®/MPO Connector

The MTP®/MPO connector is the latest development of the now legendary MT ferrule. The MT ferrule technology is at the heart of many state of the art connectors. The FibreFab range of Optronics MTP®/MPO connectors are capable of connecting between 4 and 12 fibres. The next generation of this ferrule will be used to terminate up to 72 fibres in a single connector. This allows totally new designs of fibre distribution, using densities unheard of before now.

The Optronics version of this interface is the market leader in this new and exciting field of optical fibre termination. Manufactured by FibreFab in our ISO 9001 approved facilities, the MTP®/MPO connector gives the user total flexibility in the design of their backbone, reducing costs and keeping distribution space to a minimum.

As the use of pre-terminated fibre cables grows, the MTP®/MPO gives the perfect solution to the ever-present problem of protecting the terminated fibres. The small size of the MTP®/MPO allows pre-terminated fibre cable to be fed through the smallest holes, making the installation benefits of pre-terminated fibre even greater than before.

Description

The high density MTP®/MPO connector allows the simple termination of the fibre backbone. Once installed the backbone needs to have the correct interface to suit the needs of the network hardware. Using the MTP®/MPO connector on pre-terminated fibre solutions, allows you to prepare the distribution units in the comfort of your own workshop. This can be taken a step further by having the distribution cabinets built in a clean facility and only taken to site when the installation is due to go live. This saves time, reduces the possibility of damage to the fragile optical tails and limits the risk of dirt ingress into fibre couplers.

Features

- ▶ MT based ferrule that can support up to 12 fibres.
- ▶ Very high density connector.
- ▶ Reliable quality supported by more than 15 years of FibreFab experience.

Specifications

Fibre Type:
9/125 µm singlemode
50/125 µm multimode
62.5/125 µm multimode

Fibre Count available: 4, 8, 12

Polishing: Angled or Flat

Insertion Loss (With master plug)
Standard Loss: <0.75dB
Low Loss: <0.35dB

Return Loss: >55dB (SM only)

Cable Type: Ribbon Fibre, Ribbon Cord, Microcore

Adapter Bulkhead: Simplex

Intermateability
Optically and mechanically compatible with all equivalent connectors.
Compliant with IEC 61754-7.

Optical Fibre Components

Connectors

MTP® Technology

Trunk Cable

Slimline Patch Panel

Modular Patch Panel

Patch Leads

Connector

Module

Key Features

Installation is simple and fast.
MTP®/MPO connectors are robust.
Connectors click into their adaptors and are reverse polarity protected.
Easy to use cable management solutions.

High Density

72 fibres per 1U of space.
12 fibres per connector.
Less cable yields more space in cabinets and cable raceways, giving better airflow.
Up to 15,000 fibres per rack.

Reliability

Cables terminated and factory tested.
State-of-the-art termination processes.
Quality controlled at every step.
Immune to EMI/RFI.

Low Cost of Ownership

Reduces labour cost and saves time on installation and testing.
Reduces cost of consumables and space requirements for cabinets.

Scalability

Future proof network infrastructure, to protect your investment.
Supports 10/100-1Gbps ethernet and fibre channel standards.
Singlemode capability beyond 10Gbps.

Simplicity

Modular systems designed for the fastest adds, moves and changes.
Designed for simple and easy handling, installing and testing.

Optical Fibre Components

Adapters

An optical fibre adapter or uniter is used to mate two connectors together, usually mounted in a distribution panel or wall box.

The Optronics optical fibre adapters are precision made to ensure perfect alignment of connectors, reducing insertion loss. In most cases, it is the critical part of the system that aligns the ferrule part of the connectors keep the fibres in perfect alignment.

Phosphor bronze sleeves are for general use, while the ceramic versions are normally only used in singlemode low loss environments.

In the case of the MTRJ and MTP®/MPO the alignment is carried out by two small pins fitted to one of the connectors. The adapter is purely to support and lock the connectors together in the distribution panel or wall box.

Features

- ▶ Available as FC, SC, ST, LC, MTRJ, E2000 and MTP®/MPO
- ▶ Available in simplex, duplex, quad(LC) and hybrid versions
- ▶ High precision zirconia or standard phosphor bronze sleeves
- ▶ Low insertion loss
- ▶ High repeatability and stability.

Applications

- ▶ Fibre distribution
- ▶ LAN and WAN
- ▶ FTTx Applications
- ▶ CATV
- ▶ Testing instruments
- ▶ Telecommunications systems.

Optical Fibre Components

Attenuators

Optronics singlemode attenuators are used in communication systems to reduce optical power launched onto the photo detector. These high performance devices are designed to give accurate attenuation over a wide range of wavelengths. The plug type configuration allows them to be used directly on the end of a patchcord, which in turn can insert directly into an adapter.

Available in FC, SC, LC, ST and MU connector styles with PC or APC finish providing the ultra low return loss. Optronics attenuators comes to you from a world-class manufacturing facility backed by 20 years of experience in manufacturing passive and active fibre optic devices. Products coming out of this facility have found worldwide applications in computer networking, telecommunications and cable TV.

Features

- ▶ Plug-in type package
- ▶ Accurate attenuation
- ▶ Ultra low back reflection
- ▶ Broad wavelength band
- ▶ Flat response over all wavelengths
- ▶ Environmentally stable
- ▶ Quick delivery.

Applications

- ▶ Telecommunication networks
- ▶ Fibre optic sensors
- ▶ Test and Measurement
- ▶ CATV
- ▶ LAN and WAN
- ▶ FTTx
- ▶ Attenuation values available
01= 1dB, 02= 2dB, 03= 3dB, 04= 4dB,
05= 5dB, 06= 6dB, 07= 7dB, 08= 8dB,
09= 9dB, 10= 10dB, 15= 15dB, 20= 20dB.

Optical Fibre Components

Attenuators

Description

Available range of attenuation	1 to 30dB with 1dB increments	
Operating wavelength	1310 and 1550nm (or single wavelength)	
Operating band pass	Dual Window	1310 and 1550nm (±25nm)
Attenuators = 5dB	± 0.5 dB	
Attenuators 6 to 30dB	± 10% of attenuation	
Reflectance	UPC = 55dB APC = 60dB	
International Standard	Telcordia GR-910-CORE	

The Optronics optical attenuators are manufactured using the best quality components.

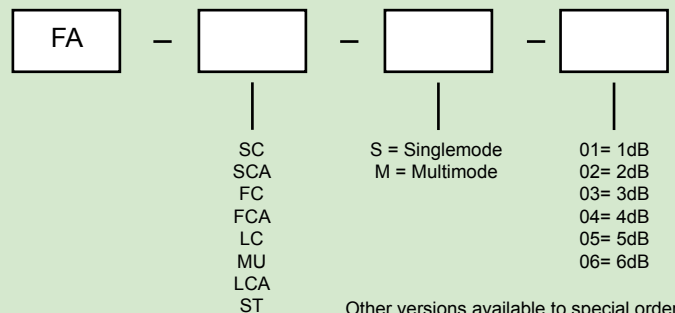

Dimensions:

FC — 10mm (OD) x 30mm (L)
 SC — 35mm (L) x 12.7mm (W) x 9.5mm (D)
 LC — 33mm (L) x 6mm (W) x 10mm (D)

Product Packaging:

Each attenuator is packaged individually.

Optical Fibre Cable

Secondary Coated Fibre

Secondary Coated Fibre - Ideal for Pigtails

Optronics secondary coated 900µm fibre cables are ideal for use within splice trays or in other protected environments. These fibres are available in either standard or easy-strip formats and in twelve different colours for easy identification.

Technical Specifications

DESCRIPTION	1-CORE

900µm Buffered Pigtail Fibre

900µm OM1 62.5/125, OM2 50/125, OM3 50/125 multimode or OS1/OS2 (ITU-T G.652D) singlemode 900µm buffered pigtail range.

- ▶ Choice of fibre types
- ▶ Choice of buffering material and stripping options
- ▶ Robust 900µm secondary coated fibres for ease of termination
- ▶ Standard white buffer colour
- ▶ Also available in 12 standard colours on request

Applications

- ▶ Pigtails
- ▶ Internal interconnect
- ▶ Ideal for a wide range of telecoms, datacoms and process control applications where ruggedisation is required
- ▶ Data centres
- ▶ Suitable for repeated handling in patch panels and racks
- ▶ Suitable for all standard connector types.

Internal Use Standard Length

G.652d Singlemode Optical Fibre

Optronics specification for ITU-T G.652d 9/125 singlemode optical fibre that exceeds the OS1 singlemode requirement. Low Water Peak (LWP) singlemode optical fibre with doped silica core and silica cladding; dual layer UV cured acrylic resin primary coatings. All fibre parameters meet or exceed the following LWP singlemode requirements.

Detailed technical specification are available on request:

- ITU-T G.652D
- IEC 60793-2-50 type B1.3
- ISO/IEC 11802 OS-1
- TIA/EIA 492-CAAB
- Telcordia GR-20-CORE

Applications

- ▶ Operational in the entire 1260 nm to 1625 nm wavelength range
- ▶ Low chromatic dispersion in the 1310 nm operating window
- ▶ Low attenuation at the 1383 nm water peak region
- ▶ Operational in the 1360 nm to 1460 nm wavelength extended band
- ▶ All OS1 Optronics cable constructions including tight buffered, loose tube and ribbon
- ▶ Supports 1 Gb/s up to an indicative 5 km in data networks
- ▶ Supports high speed multi channel video, data and voice services in metropolitan and access networks
- ▶ ATM, SONET and WDM.

62.5/125 OM1 Multimode Optical Fibre

Optronics specifications for standard OM1 62.5/125 graded-index multimode optical fibre with doped silica core and silica cladding. Dual layer UV cured acrylic resin primary coatings. All fibre parameters meet or exceed the following 62.5/125 requirements.

Detailed technical specifications are available on request:

- ITU-T G.651
- IEC 60793-2-10 type A1b
- ISO/IEC 11802 OM-1
- TIA/EIA-492AAAA
- Telcordia GR-20-CORE

Applications

- ▶ Gigabit Ethernet in high speed LAN networks, over an indicative 275 m link length at 850 nm wavelength
- ▶ Legacy networks including Ethernet, Fast Ethernet and FDDI
- ▶ All OM1 Optronics cable constructions, including tight buffered, loose tube and ribbon
- ▶ Data centres
- ▶ Premises cabling in data networks including backbone, riser and horizontal
- ▶ Supports video, data and voice services.

50/125 OM2 & OM3 Multimode Optical fibre

Optronics specification for standard OM2 and OM3, 50/125 graded-index multimode optical fibre with doped silica core and silica cladding. Dual layer UV cured acrylic resin primary coatings. All fibre parameters meet or exceed the following generic and laser-optimised 50/125 requirements.

Detailed technical specifications are available on request:

- ITU-T G.651
- OM2 to IEC 60793-2-10 type A1a.1. OM3 to IEC 60793-2-10 type A1a.2
- ISO/IEC 11801
- OM2 to TIA/EIA-492AAAB. OM3 to TIA / EIA-492AAAC
- Telcordia GR-20-CORE

Applications

- ▶ OM2 for use in 1 Gb/s high speed LAN networks over a 550m indicative link length at 850nm wavelength using a laser launch
- ▶ OM3 for use in 10 Gb/s high speed LAN networks over a 300m indicative link length at 850nm wavelength using a laser launch
- ▶ OM3 for use in 1 Gb/s high speed LAN networks over a 1000 m indicative link length at 850 nm wavelength using a laser launch
- ▶ High speed and legacy networks including Gigabit Ethernet, Fast Ethernet and Ethernet
- ▶ All OM2 & OM3 Optronics cable constructions including tight buffered, loose tube and ribbon
- ▶ Data centres
- ▶ Premises cabling in data networks including backbone, riser and horizontal
- ▶ Supports video, data and voice services.

Optical Fibre Cable

Fibre Optic Patch Cables

Simplex Fibre Optic Patch Cable

Fire Retardant Internal Use Standard Length

Optronics simplex fibre optic patch cable is ideal for use in office LAN connections, patchcords, pigtailed and internal point-to-point links where frequent handling is likely (e.g. data cabinets, equipment rooms, user outlets). Utilising 600µm or 900µm buffered fibre, the cable is suitable for use with industry standard connectors and can be easily made into a patchcord.

Optical Fibre Cable

Tight Buffered Cables

Tight Buffered Distribution Cable Multi-core (36-96 Fibres)

36 to 96 fibre, stranded sub unit rodent resistant internal distribution cables consisting of 4 to 8, 12 fibre sub units and fillers when necessary. Each sub unit consists of 12, 900 µm tight buffered optical fibres with e-glass non-metallic strength members and LSZH jacket. The individually coloured 6mm outside diameter (OD) sub units are helically stranded around an FRP central strength member with polyester wrapping tape, ripcord and Low Smoke Zero Halogen (LSZH) final jacket.

- ▶ High tensile strength.

Pre-terminated cables are available.

Please call the sales team on 44 (0)870 127 3330 for more details.
Alternatively download a copy of our Pre-terminated Cable Catalogue from www.fibrefab.com

Optical Fibre Cable

Loose Tube Fibre Optic Cables

Multi Loose Tube CST Fibre Cable (4-144 Fibres)

The multi loose tube cable construction consists of up to up to 12 elements and a maximum of 144, 250 µm optical fibres in 12 fibre gel filled loose tubes with fillers where appropriate, SZ stranded around a jacketed Fibre Reinforced Plastic (FRP) central strength member with waterswellable threads and waterswellable tape. Helically applied waterblocking e-glass non metallic strength members with ripcord. Corrugated Steel Tape (CST) armouring and black High Density Polyethylene (HDPE) or Low Smoke Zero Halogen (LSZH) jacket.

Optical Fibre Cable

Aerial Cables

Aerial Cable Figure 8 Fibre Optic Cable (24-144 Fibres)

Optronics figure of 8 aerial cable, for spans up to 70m, consists of 250µm optical fibres in gel filled loose tubes with interstitial gel. Water barrier aluminium tape or steel tape armouring options are available. Tensile strength is provided by a steel messenger wire. The cable jacket is black high density polyethylene (HDPE).

Ordering information available upon request.

Applications

- ▶ The figure of eight cables are suitable for installation in aerial environments for long haul communication.

Other diameters available on request.

Features

- ▶ Up to 144 fibres with single or multimode options available
- ▶ The loose tube stranding technology ensure fibres have good secondary excess length and allow the fibres free movement in the tube, which keeps the fibre stress free while the cable is subjected to longitudinal stress
- ▶ Aluminium moisture barrier tape and corrugated steel tape options
- ▶ Stranded wires as self supporting members provide excellent strain performance and convenient installation

Optical Fibre Cable

Aerial Cables

ADSS SLT Fibre Optic Cable (4-24 Core)

Optronic all dielectric self-supporting (ADSS) single loose tube (SLT) cables are constructed of fibres inside a gel filled central loose tube, surrounded by aramid yarn strength members and a PE outer jacket.

Optical Fibre Cable

Aerial Cables

ADSS MLT Fibre Optic Cable (24-144 Fibres)

Optronics All Dielectric Self-Supporting Multi Loose Tube (MLT) cables are constructed of fibres inside gel filled central loose tubes, wrapped around an FRP central strength member. This is encased in a PE inner jacket, aramid yarns and a PE outer jacket.

Optical Fibre Cable

Aerial Cables

Optical Ground Wire (Central Steel Tube)

Optronics central steel tube OPGW cables are constructed of loose fibres in a gel filled, stainless steel tube. This is surrounded by aluminium clad steel wires, which are in turn, surrounded by one or more layers of aluminium alloy wires.

Technical Specifications

DESCRIPTION		OPGW-1C1X20SM (AA/AS 0/48-3.6)	OPGW-1C1X24SM (AA/AS 0/54-4.0)

Rated Tensile Strength	kN	59.5	67.2
Young's Modulus	kN/mm ²	162.0	162.0
Thermal Expansion Coefficient	10 ⁻⁶ /°C	13.0	13.0
Maximum Operation Stress	N/mm ²	517.9	517.9
Everyday Stress	N/mm ²	221.9	221.9
DC Resistance	Ω/km	1.782	1.578
Short Circuit Current	KA	3.6	4.0
Short Circuit Current Capacity	KA ² s	12.7	16.1
Min. Bend Radius	mm	144	153
Installation Temperature Range	°C	-10~+50	-10~+50
Temp. Range of transportation and operation	°C	-40~+80	-40~+80

Applications

- ▶ Replacing existing aerial ground wires
- ▶ Upgrading power line communication systems
- ▶ Installing on new aerial power lines
- ▶ Provides short circuit and lightning strike protection.

Features

- ▶ Small cable diameters, light weight, low additional load to poles
- ▶ Central steel tube
- ▶ Extra fibres can be added
- ▶ Fibres are free of stress
- ▶ All metal construction means no UV or temperature degradation; long lasting
- ▶ High mechanical strength and large short circuit current capacity.

OPTICAL FIBRE CABLE

Temp. Range Transportation And Operation	°C	-40~+80	-40~+80	-40~+80	-40~+80	-40~+80	-40~+80

Applications

- ▶ Replacing existing aerial ground wires
- ▶ Upgrading power line communication systems
- ▶ Installation on new aerial power lines
- ▶ Provides short circuit and lightning strike protection
- ▶ Suitable for high fibre count and super voltage power lines.

Features

- ▶ Larger cable diameters
- ▶ Steel tube unit is placed in an eccentric position & stranded together with Al-clad steel wires and/or Al-alloy wires
- ▶ Good flexibility and crush resistance
- ▶ Fibres are free of stress and vibration
- ▶ High mechanical strength and large short circuit current capacity
- ▶ Multi layer armouring available as required.

Other diameters available on request.

Aerial Cables

Aerial Cable Accessories

Optronics offers all the accessories required to suspend both OPGW and ADSS cables from electricity power pylons or poles. These include suspension clamps, tension clamps, joint boxes, vibration dampers, armour rods, cable trays and many other items. This page is intended to provide an overview of the product range. More details are available on request.

TENSION CLAMP

- | | |
|------------------------------|--------------------------------|
| 1. Clevis thimble (optional) | 5. Dead-end component |
| 2. Extension link (optional) | 6. Structural reinforcing rods |
| 3. Thimble eye | 7. Bonding clamp |
| 4. ID tag | 8. Grounding wire (optional) |

SUSPENSION CLAMP

- | | |
|----------------------------------|--------------------------------|
| 1. Clevis thimble (optional) | 5. Outer rods |
| 2. Double eye twisted (optional) | 6. Structural reinforcing rods |
| 3. Cast aluminium clamp | 7. Grooved earthing clamps |
| 4. Elastomer insert clamp | 8. Grounding wire (optional) |

DOUBLE PREFORMED SUSPENSION CLAMP

- | | |
|------------------------------------|--------------------------------|
| 1. Clevis thimble (optional) | 6. Outer Rods |
| 2. Suspension link - double pivots | 7. Structural reinforcing rods |
| 3. Suspension link - model PS | 8. Grooved earthing clamps |
| 4. Cast aluminium insert | 9. Grounding wire |
| 5. Rubber insert | |

VIBRATION DAMPER

- | |
|--|
| 1. Cast aluminium clamp (AA) |
| 2. Galvanized steel wire |
| 3. Hammer: cast iron, hot galvanized steel |

VIBRATION DAMPER FOR ADSS

- | |
|--------------------------|
| 1. Cast aluminium clamp |
| 2. Galvanized steel wire |
| 3. Hammer |

ANTI ELECTRICAL STRESS COIL

- | |
|---------------------|
| 1. Gripping section |
| 2. Coil section |

Optical Fibre Cable

Fibre Optic Cable for Telecommunication

Direct Buried Single Jacket Fibre Optic Cable (12 -144 Fibres)

The Optronics multi element multi loose tube cable construction consists of up to 144, 250µm optical fibres in 12 fibre gel filled loose tubes with fillers where appropriate, SZ stranded around a fibre reinforced plastic (FRP) central strength member with waterswellable threads and waterswellable tape. Helicly applied non-metallic strength members with ripcord. Corrugated steel tape (CST) armouring and black high density polyethylene (HDPE) jacket.

Ordering information available upon request.

Applications

- ▶ Direct buried
- ▶ Used in application with high mechanical loads.

Other diameters available on request.

Features

- ▶ Step layer stranded construction (up to 144 fibres)
- ▶ Corrugated steel tape as protection against rodents and mechanical damage
- ▶ Thin and robust cable
- ▶ Dry core construction
- ▶ PE jacket
- ▶ Wrapped in water swellable tape
- ▶ Filled loose tube
- ▶ Fibre relevant standards ITU-T G 652, G655, G656 or a combination.
- ▶ Cable relevant standards IEC 60793 and IEC 60794.

Optical Fibre Cable

Fibre Optic Cable for Telecommunication

Direct Buried Double Jacket Fibre Optic Cable (12-144 Fibres)

The Optronics multi element multi loose tube cable construction consists of up to 144, 250µm optical fibres in 12 fibre gel filled loose tubes with fillers where appropriate, SZ stranded around a fibre reinforced plastic (FRP) central strength member with waterswellable threads and waterswellable tape. Helically applied non metallic strength members with ripcord and PE inner Jacket, Corrugated steel tape (CST) armouring and black high density polyethylene (HDPE) final jacket with ripcord.

Applications

- ▶ Direct buried
- ▶ Used in application with particularly high mechanical loads.

Features

- ▶ Single layer stranded construction (up to 144 fibres)
- ▶ Corrugated steel tape as protection against rodents and mechanical damage
- ▶ Particularly robust cable, filled loose tube
- ▶ Inner and outer jacket are made of PE jacket
- ▶ Wrapped in water swellable tape
- ▶ Core- stranded loose tube, SZ technique
- ▶ Tensile strength elements - dielectric central strength member
- ▶ Fibre relevant standards ITU-T G 652, G655, G656 or a combination
- ▶ Cable relevant standards IEC 60793 and IEC 60794.

Other diameters available on request.

Internal Management Removable Front Panels

Sliding Chassis

The new Optronics removable front panels chassis is a 19 inch 1U sliding panel in two parts: one sliding chassis and one front panel, which receives the optical adapters. Its primary advantage is the flexibility of its double composition, this allows you to maintain a stock of chassis and attach a suitable front panel as needed.

19 Inch 3U Modular System

19 Inch 3U Chassis

The standard modular chassis is supplied unloaded, without modules. This chassis allows you to choose your ideal specification. It can be loaded with up to 14 modules, equipped with the adapters arranged vertically on the 3U chassis. A splicing cassette can be added to each module in order to manage the fibres. Each module is locked into the chassis with 2 easy to operate plastic catches.

Features

- ▶ Up to 14 modules in a 3U chassis
- ▶ 21 types of modules and also a blank module
- ▶ Simple and safe locking system with 2 catches.

Advantages

- ▶ High density: up to 224 fibres in a 3U chassis
- ▶ 19 inch standard size.

Wall Boxes

The Optronics wall box system in its basic form is supplied with the box unloaded ready for you to install the adapter of your choice. The box can also be pre-loaded complete with the required adapter, or pre-loaded with pigtails to meet your project needs. The quality of construction that comes with the FibreFab range of wall boxes ensures a safe, secure and aesthetically pleasing wall box for your network.

Termination Boxes

The FibreFab range of termination boxes are designed for use in residential and business applications, for the termination of fibre optic cable. The boxes can be supplied either unloaded or pre-loaded with specified adapters. A range of accessories for these products can be found at the end of this section.

These boxes are designed to be an answer to the solution needs of FTTx systems.

Termination Boxes

Compact Termination Box

The compact termination box is designed for use in residential and business applications for the termination of up to four fibres. The wall box enables the installation of either a single Sirocco Blown Tube cable, using up to a 4 fibre blown unit, or two 2 ruggedised fibre cables to be spliced to four SC pigtails (PC or APC), which connect to adapters at the base of the unit. The unit can be quickly installed within an office, house or communication room environment.

Specification

Number of splice trays:	1
Maximum fibre capacity:	4 Fibres
Maximum cable diameter (mm):	10 mm
Maximum no. of customer feeds:	4
Required space envelope (mm):	(l) 80 x (w) 120 x (d) 25
Operating temperature:	-20°C to + 50°C (5 to 95% damp heat)
Material:	
• Cap:	FR High Impact Polystyrene
• Base:	FR High Impact Polystyrene
• Splitter trays:	FR High Impact Polystyrene
Testing:	
• Optical:	Tested 1310nm, 1550nm and 1625nm
• Dry heat:	BS EN 60068-2-2 Test Bn
• Damp heat:	IEC 60068-2-3: 1969
• Change of temperature:	IEC 60068-2-14: 1984
• Vibration:	IEC 60068-2-6: 1995
• Shock:	IEC 60068-2-27: 1987
Packing dimensions (mm):	(w) 150 x (h) 50 x (d) 100
Packed weight (kg):	0.55
Net weight (kg):	0.50

Features

- ▶ Ergonomic design
- ▶ Designed to allow cables to enter from rear or bottom of the unit
- ▶ All fibres are positively managed to maintain a 30mm minimum bend radius
- ▶ Optional removable rear entry cable management
- ▶ Flip tray to allow access to pigtails and cable entry.
- ▶ Removable cover for easy access
- ▶ Tamperproof cover, security screws available as an option
- ▶ Unit manufactured from fire resistant UL94-V0 rated material
- ▶ Patchcords exit unit on bottom face and are protected by two covers
- ▶ Standard colour white. Other colours available on request.

Ordering Information

COMPACT TERMINATION BOX	
Description	Part No.
Compact termination box	CSB06

Termination Boxes

Termination Box for Internal Use

The FibreFab internal termination box is designed for use in residential, small and large business premises. The unit houses a single splice tray, and allows fibres from internal or external cables to be spliced to pigtailed for connection to the optical network unit. The unit can be quickly installed within a home, office or communication room environment. Internal or external cable can enter the unit from the bottom or through the side of the box.

Specification:

Number of splice trays:	1
Maximum fibre capacity:	12 Fibres
Maximum cable diameter (mm):	18
IP rating:	45
Required space envelope (mm):	(w) 220 x (h) 150 x (d) 50.
Operating temperature:	-20°C to + 50°C (5 to 95% RH)
Material:	
• Wall Box:	FR ABS Light Grey RAL 7035
• Splice tray:	FR ABS Light Grey RAL 7035
Testing:	
• Optical:	Tested 1310nm, 1550nm and 1625nm
• Dry heat:	BS EN 60068-2-2 Test Bb
• Damp heat:	IEC 60068-2-3: 1969
• Change of temperature:	IEC 60068-2-14: 1984
• Vibration:	IEC 60068-2-6: 1995
• Shock:	IEC 60068-2-27: 1987
Packing dimensions (mm):	(w) 230 x (h) 160 x (d) 60
Packed weight (kg):	0.55
Net weight (kg):	0.50

Features:

- ▶ Compact wall mounted unit typically used for residential, small and large business premises
- ▶ Removable cover for easy access
- ▶ Tamperproof cover security screws available as an option (refer to optional items)
- ▶ Unit manufactured from UL94-V0 rated material
- ▶ Tray cover provides circuit protection and contains fibre ID label
- ▶ Single hinged splice tray enables access for working
- ▶ Patchcords exit from the bottom of the unit
- ▶ Up to 12 SC type pigtailed and adapters can be accommodated
- ▶ All fibres are positively managed to a 30mm minimum bend radius
- ▶ Easy cable entry points
- ▶ Optional resin pack allows box to be sealed against water/gas ingress
- ▶ Compatible with blown fibre products
- ▶ Sealed to remain IP rated.

INTERNAL TERMINATION BOX

Description	Part No.
Internal termination box	CSB04

Termination Boxes

Termination Box for External Use

The termination box is designed for use on the external wall of residential or small business premises. The unit houses a single splice tray and allows fibres from externally fed cables (blown fibre or conventional) to be spliced to pigtails, for connection to the optical network unit. Pigtails or patchcords are routed through the external wall, via a rear entry/exit position, and are protected by 25mm diameter conduit. The unit can also be used as a transition point between internal and external cable.

Specification

Number of splice trays:	1
Maximum fibre capacity:	12 Fibres
Maximum cable diameter (mm):	18
IP rating:	55
Required space envelope (mm):	(w) 220 x (h) 150 x (d) 50.
Operating temperature:	-20°C to + 50°C (5 a 95% damp heat)
Material:	
• Wall Box:	FR ABS Dark Grey RAL 7035
• Splice tray:	FR ABS Light Grey RAL 7035
Testing:	
• Optical:	Tested 1310nm, 1550nm and 1625nm
• Dry heat:	BS EN 60068-2-2 Test Bb
• Damp heat:	IEC 60068-2-3: 1969
• Change of temperature:	IEC 60068-2-14: 1984
• Vibration:	IEC 60068-2-6: 1995
• Shock:	IEC 60068-2-27: 1987
Packing dimensions (mm):	(w) 230 x (h) 160 x (d) 60
Packed weight (kg):	0.55
Net weight (kg):	0.50

Features:

- ▶ Compact wall mounted unit typically used for residential and small business premises
- ▶ Removable cover fitted with seal that allows re-entry. Water ingress protection to IP55
- ▶ Tamperproof cover security screws available as an option (refer to optional items)
- ▶ Unit manufactured from UV resistant material
- ▶ Standard kit supplied complete with all components necessary to splice an external cable to four pigtails (for applications where 12 fibres are to be spliced (external to internal cable) extra splice protectors will be required)
- ▶ Rear cable entry/exit position allows pigtails or patchcords to enter the customer premises
- ▶ All fibres are positively managed to 30mm minimum bend radius
- ▶ Cable up to 13mm in diameter can be accommodated with a cable gland
- ▶ Cable interstices can be sealed against water/gas ingress at the entry/exit position if required using a quick set resin
- ▶ Compatible with Blown Fibre products
- ▶ Sealed to remain IP rated
- ▶ Easy cable access.

Ordering Information

EXTERNAL TERMINATION BOX

Description	Part No.
External termination box	CSB05

Termination Box Accessories

Splice Protectors

Splice protectors are used to protect and join the glass fibre. They are 2.4mm in diameter, 45mm and 60mm in length. Only needed for applications where more than 4 splices are required.

Description	Part No.
45mm Splice Protector	SPLICE45CLEAR
60mm Splice Protector	SPLICE60CLEAR

Security Screw Kit

Provides secure, restricted access to prevent unauthorised entry.

Description	Part No.
Security Screw Kit	SECURESCREW

Sealant Kit

A kit containing a unique polyurethane sealant used for sealing the cable interstices within the unit. The sealant is dispensed from a hermetically sealed 170ml co-axial cartridge system. Once dispensed through the mixing nozzle and applied, the sealant transforms to an inert material.

Description	Part No.
Sealant Kit	SEAL01

Gas Seal Connector

Used for sealing a blown fibre tube. The connector simply fits over the tube providing a gas tight seal.

Description	Part No.
Gas Seal Connector	GASSEALCON

Customer Lead In Unit (CLI)

Used to guide the input fibre cable through the wall into the internal/external termination box.

Description	Part No.
Customer Lead In Unit	FIBRELEADIN

Internal Management Wall Mounted Cabinets

A strong and robust 19" wall mounted cabinet. Fully ventilated with a lockable steel framed glass door for safety and security. Quick release hinges allow easy access to the cabinet for loading equipment and cables, lockable side panels allow access from both sides. Gland plate covers and cable strain relief positions are included on the top and bottom of the cabinet.

19 Inch Wall Mounted Cabinets

19 Inch Wall Mounted Cabinets

Quick release door

Lockable side panels

Sliding mounting angles

Side latch

Secure lock

Cable strain relief positions

Features

- ▶ 600mm wide
- ▶ 6U, 9U, 12U, 15U, 18U and 22U 450mm deep
- ▶ 9U, 12U, 15U and 18U 600mm deep
- ▶ Sliding 19" mounting angles front and rear
- ▶ Standard ventilation top and bottom
- ▶ Vented framed door with safety glass
- ▶ Rear panel included
- ▶ Easy one man installation
- ▶ Heavy duty construction, 60kgs (UDL)
- ▶ Comes completely assembled
- ▶ Lockable side panels
- ▶ Door opens 180°, left or right hinged
- ▶ Built in cable strain relief positions.

Specification

- ▶ Top and base panel 1.2mm
- ▶ Side panels 1.2mm
- ▶ Framework 1.2mm
- ▶ 19" mounting angles 1.5mm
- ▶ Matching lock configuration on side panels
- ▶ Individual lock on front door
- ▶ Chassis support (L RAIL) Maximum load 20Kgs
One pair included
- ▶ Material thickness 1.2mm.

19 Inch Wall Mounted Cabinets

Specification

- ▶ Paint: degrease
- ▶ Phosphate dipped
- ▶ Powder coating RAL 7035
- ▶ UDL (Uniformly Distributed Load) 60 kg
- ▶ Degree of protection IP20
- ▶ Fan kit (Optional extra)
Up to two fans can be fitted to top or bottom cover.

Ordering Information

FAN KIT
2 x Fan
2 x Finger guard
1 x Lead
8 x Screws
Part No.: FANKIT1

Equipment Installation

- ▶ Drill and mount wall bracket into the desired position
Minimum of 5mm screws
Maximum of 8mm screws
- ▶ Simply lift cabinet onto the bracket hooks
- ▶ Secure to the bracket with internal screws.

Internal Management Floor Standing Cabinets

The new 19" floor standing cabinet range are high quality, competitively priced cabinets that offer real value for money in today's market.

All our cabinets combine a robust design and attractive styling, consisting of an aluminium frame chassis with glass or steel doors. All round access is available via removable side panels while front and rear doors have quick release pins for easy removal. Front and rear mounting angles are fully adjustable through the depth of the cabinet. An earthing kit and foam cable entry glands are included in the base.

These cabinets are ideal for office environments, data networking, broadcast, security and audio visual applications.

Features

- ▶ Very durable yet lightweight aluminium frame and corner castings
- ▶ Over 800kg UDL (Uniformly Distributed Load)
- ▶ Available in 600mm, 800mm and 1000mm widths
- ▶ Available in 27U, 37U, 42U and 47U heights
- ▶ Front and rear doors open 180°
- ▶ Adjustable feet and travel castors included
- ▶ Simply roll into place and jack level.
- ▶ Lockable side panels
- ▶ Multi function top panels
- ▶ Fully vented steel doors have >55% open area
- ▶ Optional safety glass, steel or vented doors
- ▶ U Position screen print as standard
- ▶ Bottom entry cable gland
- ▶ Earthing points and earthing kit included
- ▶ Black RAL9004.

IP Rated Wall Boxes

The FibreFab range of IP rated wall boxes are constructed to comply with different levels of the Ingress Protection Rating Scheme. The boxes in their basic form are supplied unloaded ready for you to install the adapter of your choice. The box can also be pre-loaded complete with your required adapter and simple splice management kit, or pre-loaded with pigtails to meet your project needs.

To view our full range of products download our Fibre Management Catalogue now at www.FibreFab.com.

Fibre Optic Enclosure

Box Enclosure

The growing usage and application of high-speed communication networks together with high population density, demand the installation of high-fibre count optical fibre cable networks. However, the currently available optical fibre splice closures are deemed bulky and their installation complex and time consuming. The mini closure is acid and alkaline resistant. Furthermore, its airtight, waterproof design makes it ideal for applications in a damp environment. Since the casing material is recyclable, environmental pollution is minimized. The ease of installation is evident, a screwdriver is all you need from start to finish. In addition, for loose tube applications no heat shrinking work is required.

Applications

- ▶ Suitable for loose tube cables or slotted core ribbon cables
- ▶ Can be used in through, branch, or mid-span type splice locations
- ▶ Suitable for aerial, underground, duct, or buried applications.

Specification

- ▶ Manufactured from acid/alkaline-resistant and impact resistant polypropylene
- ▶ Working temperature range: - 40°C to +80°C
- ▶ Cable entry pulling strength: 30 kgs
- ▶ Compressive resistance: 3000 N.

Features

- ▶ All-in-one construction
- ▶ Compact and lightweight
- ▶ Acid and alkaline resistant
- ▶ Airtight and waterproof
- ▶ Simple installation
- ▶ Wall mounted
- ▶ Ideal for cable repair work
- ▶ Environmentally friendly.

External Management Fibre Optic Enclosure

Inline Enclosure

Integrated pressure valve

The inline enclosure is suitable for protecting fibre cable splices in straight through and branching applications. Its well-engineered, injection moulded outer body makes it impenetrable to the elements. It can protect splices and ensure reliability with usage in ambient temperatures from -40°C to +65 °C. It can be placed in aerial, underground, wall mounted, or duct mounted locations.

Features

- ▶ Holds 24 to 192 splice's
- ▶ Easy to re-enter
- ▶ 3 cable entry position at each end
- ▶ Termination and splice kit included
- ▶ Integrated seal, airtight and waterproof
- ▶ Ideal for cable repair
- ▶ RoHS compliant
- ▶ Can be used in through, branch or mid span splice locations
- ▶ Suitable for aerial, underground duct or direct burial applications.

Dome Enclosure

The dome enclosure is suitable for protecting fibre cable splices in branching applications. Its well-engineered, injection-moulded outer body makes it impenetrable to the elements. It can protect splices and ensure reliability with usage in ambient temperatures from -40°C to +65 °C. It can be placed in aerial, wall mounted, or duct mounted locations.

Features

- ▶ Holds up to 144 fibres
- ▶ Easy to re-enter
- ▶ Cable entry/exit, 1 oval and 4 round
- ▶ Integrated pressure valve
- ▶ Termination and splice kit included
- ▶ Integrated seal, airtight and waterproof
- ▶ Ideal for cable repair
- ▶ RoHS compliant
- ▶ Can be used in through, branch or mid-span splice locations
- ▶ Suitable for aerial, underground duct or direct burial applications.

Hinged Fibre Splice Enclosure

Pigtail entry
Test cable entry
Uncut cable entry
Cable entry

Features

- ▶ Opens via left hand hinge
- ▶ Multi cable entry points
- ▶ Integrated pressure valve
- ▶ Integrated earth point
- ▶ Holds up to 60 single fibres
- ▶ Integrated fibre management
- ▶ Mechanically sealed (compression).

Benefits

- ▶ Multi-functional splicing options
- ▶ Includes all splice protection
- ▶ Includes wall mounting bracket and fixings
- ▶ Can be pole mounted (optional extra)
- ▶ Can be aerial mounted (optional extra.)

Specification

Maximum single fibre count	60
Maximum fibres per tray	12
Maximum number of trays	5
Number of cable entry points	3
Suitable for cable diameters	8mm to 15mm Ø

Blown fibre hole panel plate	CMB11

Our sliding patch panels include a removable rear section enabling you to install several options of cable entry:

- ▶ MPO
- ▶ Extra 20mm or 25mm gland holes
- ▶ Blown fibre cable entry
- ▶ A selection of options made to order

Removing the panel completely allows you to install larger diameter cable such as steel-tape-armoured. The cable can be installed directly into the panel, and using the cable tie positions, the strength member can be secured, directly to the sliding tray.

OPTRONICS
TOOLS

EASY HANDLE STRIPPER

Description	Part No.
Easy Handle Stripper	OPT-FOS
This hard wearing, easy to handle fibre optic stripping tool includes three stripping guides for: 2mm outer jacket, 900µm Buffer, and 250µm acrylic coating, Safety catch and factory set adjuster.	

JACKET STRIPPER

Description	Part No.
Jacket Stripper	OPT-CS
Ideal for stripping jackets from backbone cable between 4.5mm and 25mm in diameter. A small rotating blade accurately splits the circumference of the jacket, then by flicking a switch, the same blade will rotate 90° and is used to split the jacket down one side for easy removal.	

CARBIDE PEN CLEAVER

Description	Part No.
Carbide Pen Cleaver	OPT-CPC
This well presented pen-style scribe, uses a 30° wedge shaped carbide tip. Its design makes for quick and precise cleaving of optical fibre.	

KEVLAR SCISSORS

Description	Part No.
Kevlar® Scissors	OPT-KS
These light-weight shears are ideal for cutting the Kevlar® strength members found in fibre optic cables. Ergonomic, moulded handles provide comfort for both right and left-handed users. The one micro-serrated blade reduces slipping for more positive cutting action. Length: 140mm Weight: 79g.	

UNIVERSAL CRIMP TOOL

Description	Part No.
Fibre Optic Crimp Tool	OPT-FOCT
This professional ratchet-style crimping tool is constructed of solid steel. The rubber handle provides a firm grip and includes a ratchet mechanism for consistent crimping.	
Crimp Specifications: .78" / .151" / .128" / .78" / .068" / .042" (4.52 / 3.84 / 3.25 / 2.0 / 1.72 / 1.07mm)	

Kevlar is a registered trademark of DuPont

Optronics Tools and Other Brands

OPTRONICS
TOOLS

UNIVERSAL STRIPPER

Description	Part No.
Universal Data Stripper	OPT+UTPS

This tool is ideally used for stripping the jacket from round data cable such as UTP and STP. With an adjustable blade it will strip from 3.2mm to 9mm on flat cable, irregular out of shape cable or even multi-conductor cable.

UTP/STP CYCLOPS STRIPPER

Description	Part No.
Cyclops Stripper	OPT+CYCLOPS

An outer sheath stripper for all types of data, audio and fibre optic cables. Completely automatic, no adjustments required. For cables up to 11mm in diameter.

MODULAR CRIMP TOOL

Description	Part No.
Modular Crimp Tool	OPT-RJCT

A compact, lightweight and durable tool which can be used to crimp RJ45, RJ12 or RJ11 connectors onto data cable. In addition to crimping it can also be used to cut and strip round cable - although we recommend you use OPT+UTPS to perform this particular task.

IMPACT PUNCH DOWN TOOL

Description	Part No.
Impact Punch Down Tool	OPT+IPPT-S
Spare Scissor Blade	OPT+IPDT-SB

The impact punch down tool comes with an adjustable Hi-Lo pressure selector. The hook and tracer makes tracing and removing wires easy, and the twist lock style holder gives the ability to quickly and safely change blades.

NETWORK TESTER

Description	Part No.
Network tester	OPT+NT

This basic level network tester will comprehensively test each twisted pair through RJ45 or RJ11 connectors. An easy red and green light system will notify you of which pairs are fully functional and which are faulty. Comes with remote end terminator for testing links and patchcords. Requires 1X 9V battery (not included).

CLAUSS FIBRE OPTIC STRIPPER

Description	Part No.
Quality fibre optic cable stripper	CFS-2
<p>The CF2-2 stripper incorporates two holes for stripping fibre optic cable. The first size accurately removes 250µm coatings and 900µm buffer tube. The second hole is able to strip cable jackets up to 3mm diameter.</p>	

MILLER TRI-HOLE FIBRE OPTIC STRIPPER 1

Description	Part No.
Tri-hole fibre optic cable stripper	FO103-T-250-J
<p>The tri-hole fibre optic stripper is an exceptional tool, recommended for stripping 250µm coated loose tube fibre and 900µm buffer tube. This stripper has a .0055" (0.14mm) laser drilled hole, soft plastic cushioned handle grip, and super accurate hardened stripping jaws ensuring a clean smooth stripping action.</p>	

MILLER DUAL-HOLE FIBRE OPTIC STRIPPER 2

Description	Part No.
Dual-hole fibre optic stripper	FO103-D-J
<p>The FO103-D-J A 140µm diameter hole and V-opening in the blade make this tool ideal for stripping 250µm buffer coating, to expose 125µm clad fibre. A second hole strips 2-3mm fibre jackets. It is pre-set at the factory so no adjustments are needed.</p>	

MILLER FIBRE OPTIC STRIPPER

Description	Part No.
Miller V-hole fibre optic strippers	FO103-S
<p>These factory set strippers require no adjustment and prevent scratching or nicking of optical fibre. All cutting surfaces are precision formed, hardened, tempered and ground, assuring precise buffer removal.</p>	

NO-NIK FIBRE OPTIC STRIPPER

Description	Part No.
NO-NIK 200µm fibre optic stripper	NN203
<p>In a single short stroke the red handle removes 900µm buffer tube and the 250µm or 500µm fibre coating on tight buffer cable.</p>	

Tools and Test Equipment

Optronics Tools and Other Brands

ABECO "CC" SERIES CABLE CUTTER / STRIPPER

Description	Part No.
-------------	----------

Cable cutter	CC60
--------------	------

These durable cable cutters are designed to strip solid and stranded copper and aluminium conductor. Constructed of high quality carbon steel the preformed rounded jaws automatically position for optimum cutting.

ABECO JACKET STRIPPING TOOL

Description	Part No.
-------------	----------

Jacket stripping tool	MK02
-----------------------	------

This stripper can be used on 4.5 to 28.5mm cable insulations and has an adjustable cutting depth of 3mm, as well as alternative blade options to suit different jacket types. Its stripping action is both circumferential and longitudinal, for the removal of insulation or mid span wires.

ABECO JACKET STRIPPING TOOL

Description	Part No.
-------------	----------

Jacket stripping tool	MK01A
-----------------------	-------

Designed for precision stripping of a variety of insulation types including rubber, PVC, nylon, cotton and coaxial cables from 8mm to 25mm diameter. Its stripping action is both circumferential and longitudinal for the removal of insulation or mid-span wires.

RIPLEY MAGNI TWEEZERS

Description	Part No.
-------------	----------

Magni tweezers	MT-1
----------------	------

This handy stainless steel tool is specifically suited to fibre optic applications. Its integral magnifier improves ability to work with small fibre optic segments.

MILLER KEVLAR SHEARS

Description	Part No.
-------------	----------

Kevlar® shears	KS-1
----------------	------

These lightweight shears are perfect for cutting Kevlar® strength members. The blades are made from high carbon molybdenum and vanadium steel for a long life and a precise, neat cut.

Kevlar is a registered trademark of DuPont

Termination Kits

Cold Cure and Heat Curing Fibre Termination and Inspection Kits

OPTRONICS
TOOLS

Cold Cure Kit Contents

Heat Curing Kit Contents

The Optronics cold cure fibre termination and inspection kit, is a much needed and valuable piece of kit for anyone who wishes to terminate fibre using the cold cure method. The Optronics heat curing fibre termination and inspection kit is a much needed and valuable piece of kit for anyone who wishes to terminate fibre using the heat cure method, it uses the high quality temperature curing epoxy from ResinTech, in conjunction with a Fibretron curing oven. These kits are suited for anyone who is competent at terminating fibre. Each kit contains the Optronics range of tools (contents listed below). An inspection scope also comes as standard. All items are packed into their own cut-foam compartment to keep them safe from damage, and all are presented in a very robust, virtually indestructible, yet stylish case, ideal for such fragile equipment.

Optronics has recently updated and modernised their range of tool kits. They are a must-have for any installer in the fibre optic industry. Our kits now come loaded with the high quality and very popular range of OptronicsTools, giving the user comfort in the knowledge that they are using a superior tool with a consistent quality in performance which is critical in our industry today. The excellence of the OptronicsTools is also represented in the tool case which the tools are presented in.

The tool cases themselves are IP67 rated, and are normally used in military applications, therefore, you can be assured that they have passed rigorous tests. Our cases offer the following features and benefits:

- ▶ Airtight
- ▶ High thickness body material
- ▶ Crush & Shock proof
- ▶ Watertight and waterproof
- ▶ Interstackable
- ▶ Can withstand temperatures between -33 & +90 °C
- ▶ Sand and dust proof

The inserts are made from a very dense foam which will not absorb any liquid that may be spilled. This is ideal for protecting any fragile equipment contained in the kit. The foam inserts have been routed via a computerised method, this allows the contents to fit perfectly, in their own special areas, ensuring maximum security from possible damage.

In addition to the standard kits, we also offer a customization programme for those who wish to really put their own mark on the kit and decide exactly how the contents should be made up. (MOQ, price variations and lead times will apply).

Termination Kits

Installers Tool Kit

OPTRONICS
TOOLS

The Optronics network installer kit is a must have for anyone who is terminating a copper network. It contains all the essential tools needed for copper installation. It is suited to all levels of users, from an apprentice, right up to an experienced engineer. The kit contains the Optronics range of tools (contents listed below). The tools are packed into their own cut foam compartments and all are presented in a robust, virtually indestructible, yet stylish case.

Optronics has recently updated and modernised their range of tool kits. They are a must have for any installer in the copper industry. Our kits now come loaded with the highest quality OptronicsTools, giving the user comfort in the knowledge that they are using a superior tool with a consistent quality and performance, which is critical in our industry today. The excellence of the OptronicsTools is also represented in the tool case, which the tools are presented in.

The tool cases themselves are IP67 rated and are normally used in military applications therefore you can be assured that they have been through and passed rigorous tests. Our cases offer the following features and benefits:

- ▶ Airtight
- ▶ Interstackable
- ▶ High thickness body material
- ▶ Crush proof
- ▶ Corrosion proof
- ▶ Watertight and waterproof
- ▶ Shock proof
- ▶ Sand and dust proof
- ▶ Can withstand temperatures between -33 & +90 °C

The inserts are made from a very dense foam which will not absorb any liquid that may be spilled. This is ideal for protecting any fragile equipment contained in the kit. The foam inserts have also been routed via a computerised method, this allows the contents to fit perfectly in their own special areas, ensuring maximum security from possible damage. The two-tone effect allows for the easy identification of missing tools.

In addition to the standard kits, we also offer a customization programme for those who wish to really put their own mark on the kit, and decide exactly how the contents should be made up. (MOQ, price variations and lead times will apply)

OTDR

Multimode and Singlemode OTDR

A user friendly multimode and singlemode OTDR specifically designed for testing and trouble-shooting on enterprise, campus and access networks. The OTDR's robust construction and long battery life make it ideal for use in the field.

A single button push starts a test, making it simple to use for the beginner or expert. The result is then shown as a trace or table-of-events in full colour, making for uncomplicated location of faults on fibre cable. By transferring the results to a USB memory stick, or directly to PC via the USB port, easy management of the results can be achieved using the free software provided. Improved fibre testing capability can be achieved by adding the optional power meter, visual fault locator and connector end-face inspection probe. This ensures that the Optronic OTDR is a truly versatile fibre optic test instrument.

Features & Benefits

- ▶ 850/1300nm wavelengths for multimode
- ▶ 1310/1550nm wavelengths for singlemode
- ▶ Internal memory for up-to 500 results
- ▶ 8 hour battery life
- ▶ Transreflective colour screen
- ▶ One touch testing.
- ▶ 6 languages: English, French, German, Spanish, Russian and Chinese
- ▶ Optional VFL, power meter or Inspection probe
- ▶ SC, ST & FC ports available

Specification

	MULTIMODE	SINGLEMODE
Wavelength	850/1300nm	1310/1550nm
Dynamic Range	20/20dB	25/24dB
Event Dead Zone	3.5m	3m
Attenuation Dead Zone	12/12m	12/13m
Sampling Points	Over 30,000	
Distance Range	5km	50km
Internal Memory	500 Results	
OTDR Port Connector	SC	
Size (H x W x D)	250mm x 125mm x 75mm	
Weight	1kg	
Operating Temperature	-18 °C to 50°C	
Battery	2 x Li-ion batteries 8 hours continuous use	

*All specifications valid at 23.C ± 2.C with an FC/PC connector. Dynamic range using 10µs pulse and 3min averaging at SNR=1. MM dynamic range is specified for 62.5µm fibre. Dead zones with a -45dB reflection for SM, with a -35dB reflection for MM, using the shortest pulse.

Optronic also offers a complete range of cleaning products for your OTDR. See page 129

OTDR

Power Meter

Adding the power meter to the OTDR gives the flexibility of two testers in one. It can be used in conjunction with an external light source to measure the loss of fibres, or by means of looping back the OTDR can be used as both light source and power meter. The power meter covers the range from 800nm to 1650nm, offering a power range of -60 to 26dBm. The power meter also comes with a very cost effective three year calibration interval. An SC connector adaptor is supplied as standard, other interfaces are available.

Inspection Probe

The inspection probe option gives you superior vision into your fibre optic network by enabling you to inspect all types of connector end faces in switches, routers, interface cards, patch panels, wall outlets and patchcords. It saves time by eliminating the need to access the back of patch panels or disassemble hardware devices for inspection. Instead of removing each individual fibre, you only need to insert the video probe to inspect the end-face while it is still in place. This is the only practical way to inspect many hardware devices, where disassembly is not a realistic option. A clear image is displayed on the screen of the OPT OTDR, enabling a quick and easy review of any potential problems. The image can be saved and downloaded for future documentation purposes.

VFL

The visual fault locator option provides a visible 650nm red laser with a universal 2.5mm ferrule adaptor, with continuous and flashing modes. The VFL will verify continuity and polarity of installed links, which will help to speed up installation time. It can also be used to locate breaks and excessive bends in fibres, connectors and splices where they are terminated into patch panels, ensuring that fibre management is carried out correctly. Problem patchcords can also be quickly identified as the VFL will show breaks and bends through the jacket.

Tools and Test Equipment

Dead Zone Eliminator

Compact Dead Zone Eliminator

OTDRs require launch and receive test cables to measure the end-to-end loss of optical fibre links. A launch cable, which connects to the OTDR to the link under test, reveals the insertion loss and reflectance of the near-end connection. A receive cable, which is connected to the far-end of the link, reveals the insertion loss and reflectance of the far-end connection.

Optronics launch cables are available in a compact rugged box with 1.5m connectorised tails (or made to custom lengths). These can be neatly stored underneath the box with the provided hook and loop ties. The box is loaded with 150m of fibre as standard and lengths up to 500m can be supplied on special order. The tails can be terminated with the connector combination of your choice. It is supplied in a protective pouch with a handy belt loop. Available fibre types are 50/125, 62.5/125 and 9/125.

Features

- ▶ 1.5m tails
- ▶ Choice of connectors
- ▶ 150m of fibre standard
- ▶ No splicing.

Advantages

- ▶ Compact solution
- ▶ 150m of fibre as standard
- ▶ Rugged construction
- ▶ 50N cable retention force.

Technical Specification

Optronics test all terminations as per IEC 61300-3-4 and IEC 61300-3-6.

Specific link losses over the length are dependent upon fibre type, wavelength used and length of fibre. Individual test certification supplied with each product.

For individual fibre specifications please see our standard fibre datasheets.

Operating Temperature	-40 to +85°C
Intermateability	Compliant with IEC 61754 series
Fire Performance	Compliant with IEC 60332-1

OPTM Fibre Optic Loss Test Kit

OPTM Fibre Optic Loss Test Kit

The OPTM test kit is an inexpensive solution for testing multimode systems. The OPTM kit combines the OPTPM optical power meter and the OPTLS Dual optical light source which operates at 850nm and 1300nm. The OPTM test kit is a ideal kit for beginners or network owners and can be used for testing premise networks, LAN, and gigabit ethernet.

Features

- ▶ Multimode testing
- ▶ Includes 50µm and 62.5µm mandrels
- ▶ Certify 50µm or 62.5µm multimode fibre
- ▶ NIST traceable.
- ▶ Loss measurements at 850 and 1300nm
- ▶ Field portable, battery operated
- ▶ Links for any 850 or 1300nm application, including gigabit ethernet (GBE).

ORDERING INFORMATION

Description	Part No.
Optical light source, optical power meter protective rubber boots, adapter cap, 50µm and 62.5µm mandrels, user's guide, and carrying case.	OPTMKIT
Test leads and connector adapters are required for operation (purchased separately). Test leads with a variety of connector styles and fibre types are available. Adapter caps for most common connectors may be purchased.	

Technical Data

RoHS Compliant

MODEL	OPTM KIT

Tools and Test Equipment

Visual Fault Locator/ OPTVFL-2

Visual Fault Identifier OPTVFL

The OPTVFL-2 is a slim-line, compact visual fault locator, designed to troubleshoot faults on fibre optic cables. It's light-weight, pen style makes it ideal for the installer to carry with them on site.

The OPTVFL-2 is an excellent addition to an engineers tool set because it can locate broken fibre inside the OTDR's dead-zone. Being portable and light it lends itself to other applications, including end-to-end continuity checks, identifying connectors in patch panels, and identifying fibres during splicing operations. The universal connector interface provides fast operation with many connector styles, without the need to change adapters

Features

- ▶ 650nm visible red laser source
- ▶ High power (1mW).
- ▶ 1.25mm adapter available (for LC)
- ▶ Slim line pen-style with handy pocket clip
- ▶ 2.5mm universal connector interface for quick connection (for SC, ST, FC)

Technical Data

PARAMETER	VALUE
Size (L x d)	170mm x 13.5mm
Weight	88g (including batteries)
Connector type	Universal 2.5mm adapter
Power	2 AA alkaline batteries (40 hours typical)
Operating temperature	0 to 40°C, 95% humidity non condensing
Storage temperature	-20 to 60°C, 95% humidity non condensing
Emitter type	Class 2 Laser diode
Wavelength:	650nm nominal
Output power	1 mW (into single-mode fibre)
Modulation	2 Hz or CW selected

LOW LINT TISSUE	PACK SIZE	PART NO.
Lint Free Tissues	100	CLEANTISSUE/100
Lint Free Tissues	400	CLEANTISSUE/400

Low lint tissues are a versatile consumable for many applications. They are primarily used to clean bare fibre as part of the termination or splicing process. The low lint characteristic allows them to be used for a multitude of other purposes, such as cleaning optical equipment and preparing work surfaces.

- ▶ Super fast absorbency
- ▶ Can be used dry or with fluid
- ▶ Leaves reduced lint / fluff / dust particles
- ▶ Removes and absorbs dirt / grease / water / chemicals
- ▶ Tear resistant
- ▶ Strong non woven material.
- ▶ Material: 44% wood pile tissue & 56% Terylene
- ▶ Size: 100mm x 100mm
- ▶ Thickness: 0.05mm
- ▶ Absorbency rate: 560%
- ▶ Absorbency speed: 5 seconds
- ▶ Class:10000.

IPA WIPES	PACK SIZE	PART NO.
IPA Saturated Wipes	50pcs	CLEANWIPES

The Optronics pre-saturated wipes contain 99% pure IPA (isopropyl alcohol). The wipe material is made from a high quality, non-abrasive, low lint fabric. They can efficiently remove dust, grease, oil, flux, soils and other contaminants or residues from substrates prior to bonding such as bare optical fibre during a termination or splicing process.

- ▶ High absorbance and liquid retention
- ▶ Strong and tear proof
- ▶ Resistant to vigorous use
- ▶ Safe on plastics
- ▶ Rapid evaporation
- ▶ Zero residue
- ▶ Non-abrasive
- ▶ Low lint fabric
- ▶ Ideal for cleaning bare optical fibre.
- ▶ Low lint saturated wipe
- ▶ 99% pure Isopropyl Alcohol
- ▶ Wipe Size: 157mm x 176mm
- ▶ Sachet Size: 63mm x 59mm x 5mm
- ▶ PH: Neutral
- ▶ Evaporation Rate: 1.9
- ▶ Highly flammable.

FOAM BUDS	PACK SIZE	PART NO.
2.5mm Foam Buds	100 pcs	CLEANBUDS

Foam buds are the ideal consumable for cleaning bulkheads after installation. They are used to clean the end faces of installed connectors, from inside the enclosure. The snug fit from the foam head will also remove any contaminants found inside the adapter.

- ▶ Fast absorbency
- ▶ Can be used dry or with fluid
- ▶ Efficient removal of contaminants
- ▶ Leaves no lint / fluff / dust particles
- ▶ Removes and absorbs dirt / grease / water / chemicals
- ▶ Works with all 2.5 mm adapters: SC, SC2, FC, ST, DIN, D4, MT.
- ▶ Material: Polyurethane
- ▶ Thickness:0.05mm
- ▶ Absorb speed:6-8 seconds
- ▶ Class:10000.
- ▶ Size: 68mm x 2mm (body)
9mm x 3mm (head)

MICRO FIBRE STICKS	PACK SIZE	PART NO.
1.25mm Micro Fibre Sticks	100 pcs	CLEANSTICK

Micro fibre sticks are the ideal consumable for cleaning 1.25mm bulkheads after installation. They can be used to clean the end faces of installed connectors, from inside the enclosure. Cleaning is achieved by inserting the micro fibre tip inside the adapter's aperture and twisting once. The micro fibre material allows the user to clean installed connector end faces without scratching the surface, and ensures a perfect clean first time.

- ▶ Fast absorbency
- ▶ Can be used dry or with fluid
- ▶ Efficient removal of contaminants
- ▶ Leaves no lint / fluff / dust particles
- ▶ Removes and absorbs dirt / grease / water / chemicals
- ▶ Works with 1.25mm adapters: LC, MU.
- ▶ Material: Micro fibre, antistatic
- ▶ Thickness:0.05mm
- ▶ Absorb speed:6-8 seconds
- ▶ Class:10000.
- ▶ Size:10mm x 4mm (body)
13mm x 2mm (head)

Optronics Branded

Optronics Cleaning Kit

The Optronics fibre optic cleaning kits combine all the best and most widely used products in one simple to use package. They contain all the necessary products to competently and professionally clean fibre optic installations. With 3 levels of kit available it's easier to choose the right one for the application.

Feature and Benefits

- ▶ High quality products
- ▶ 3 levels depending on user application
- ▶ Products available individually for kit refill
- ▶ Provided in a soft carry case.

Telecommunication Products

Bespoke Solutions

Steady growth and non-generic development within the Telecommunications industry, has brought with it requirements for new and bespoke products. At FibreFab our design team has worked with many clients to develop and co-develop products which originally started life as bespoke solutions but in time have evolved to become a standard, common place product.

Splitting and distribution are also becoming more prevalent in the Telecoms market. As a result, the requirement for easy installation and usage has also increased.

In an endeavour to meet these requirements, FibreFab is able to offer its complete range of splitters, CWDM's, and WDM solutions in all varieties and as managed solutions, including ruggedised housings or modules to be mounted within a patch panel or FTTx box. FibreFab is able to design a product specific to your needs.

Our research and development facilities span the globe providing us with engineering expertise from different backgrounds and cultures. This combined experience gives us a well rounded approach to engineering, enabling us to meet the specific requirements of our customers.

Our global operation enables us to design, manufacture and test any prospective products. This process is fully managed with our customers, to develop the best solution.

CAD design, manufacturing, and laboratory testing facilities integrate to ensure we can manage all areas of production from concept to reality.

Our goal is to provide the customer with a fully loaded, bespoke solution, so all that is required in installation is connection to the existing equipment.

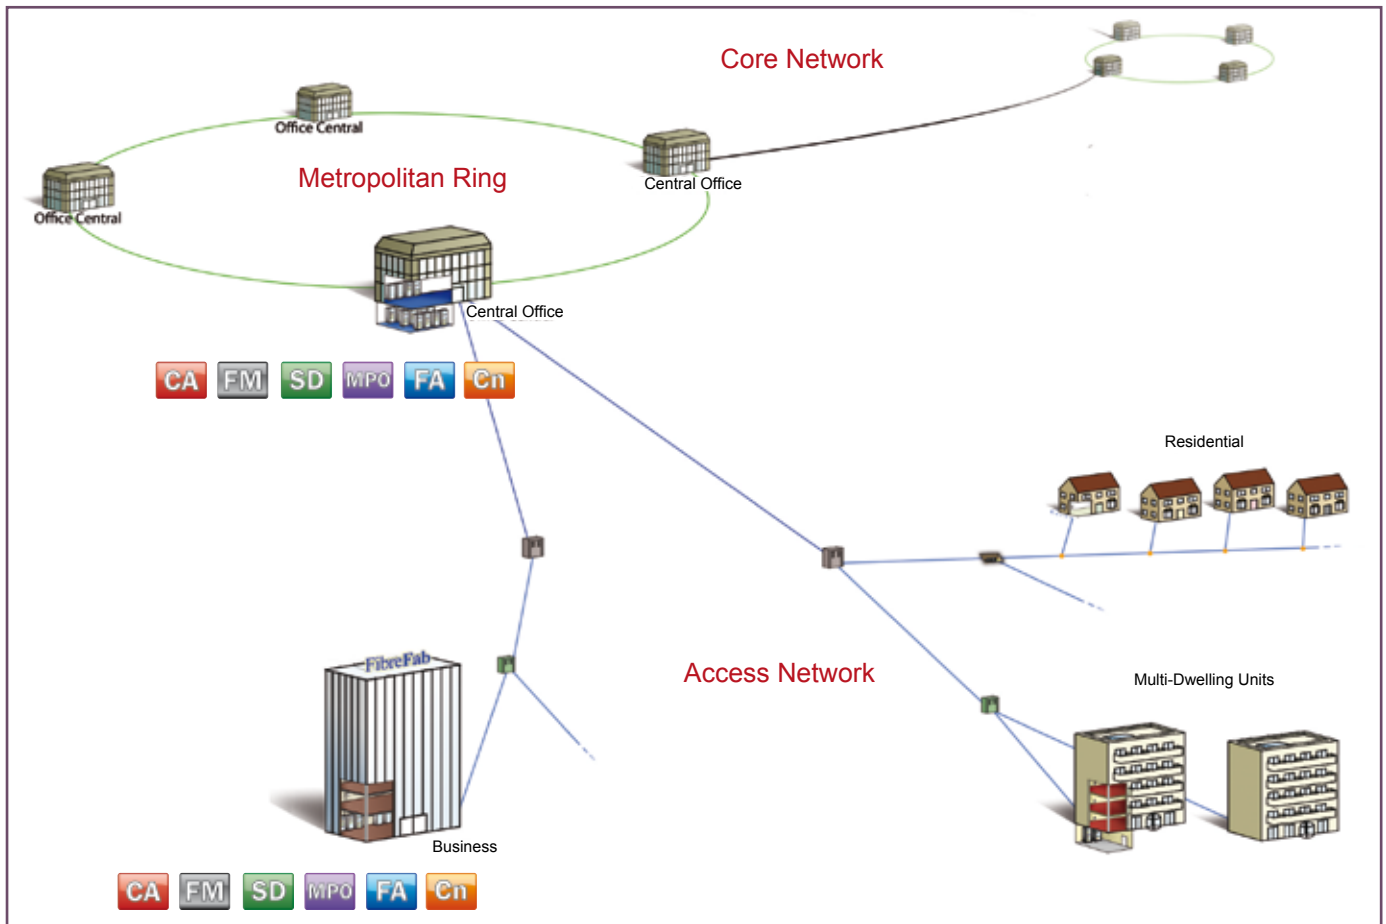

You can find all of our FTTx solutions in our FibreFab FTTx brochure to download on www.FibreFab.com

Telecommunication Products

FTTx

Advances in the Telecommunications industry are being driven by the increased broadband requirements of the subscriber. Consumers expect higher reliability and a high level of service. The broadband market is experiencing an increase in subscribers, who are accessing the central office through fibre or VDSL networks. Both options place an increased demand for fibre connectivity requiring more systems and sub-systems, this has a 'knock back' effect through the network. Consumer requirements for high speed connections supporting a range of applications, from music or movie downloads, online gaming, HDTV and VOD (video-on-demand) to sophisticated telephony systems, means operators will need to increase the capacity of their networks. FibreFab offer a range of products designed for use with the long haul, core, metro and access networks.

SD Splitters and Distribution
Splitters, WDM, CWDM etc.

CA Connectors and adapters
Full range of connectors and adapters

Cn Connectivity
Attenuators

OSP External Relay
ODF, cabinets and dome enclosure

FA Fibre optic assemblies
Patchcords, pigtails, pre-terminated cables

FM Fibre Management
Wall mounted cabinets, floor standing cabinets, patch panels, wall boxes, splice modules

MPO Connectors and adapters
MPO panels, fan out, modules

Telecommunication Products

Media Converters

The Optronics media converter will accept your copper signal and transmit it over fibre to distances of up to 120km. The unit benefits from being able to specify the type of connector you require with single or dual fibre networking. The diagnostic lights you can tell when your network is functioning correctly.

Features

- ▶ Low cost
- ▶ Supports auto MDI-MDIX function on ethernet
- ▶ Supports link fault pass through function
- ▶ LED display for link/activity, full/half 10/100
- ▶ Supports converter or switch mode
- ▶ Built in universal AC/DC power supply or external power supply depending on model.

Applications

- ▶ LAN
- ▶ FTTx
- ▶ Telecommunication Networks.

SPECIFICATIONS

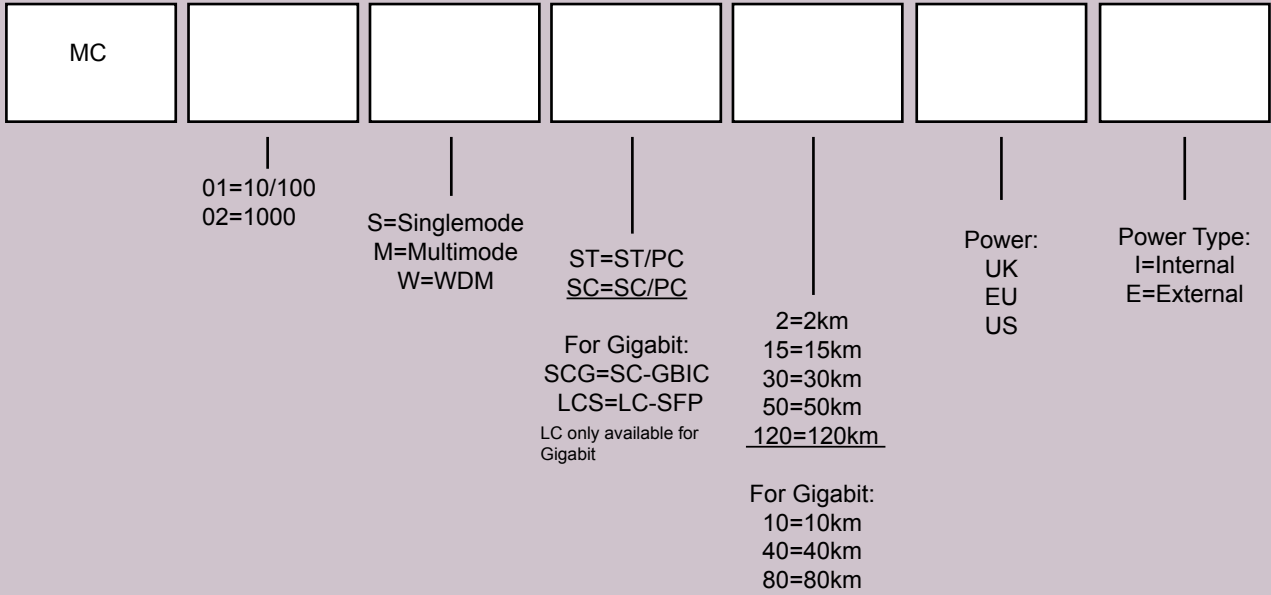

Complies		IEEE 802.3 10 Base-T, 802.3u 100Base-TX and 100Base-FX standards
6 LED		Power, Ethernet and fibre link and work status
Operating Temperature	°C	0-50
Storage Temperature	°C	0-70
Operation Humidity		20-80%
Storage Humidity		10-90%
Power Consumption	W	<2W
Dimensions (LxWxH)	mm	191.7x85.6x30
Weight (g)	g	340
Compliance		FCC part 15 classA, CE
MTBF	hours	38000

SPECIFICATIONS

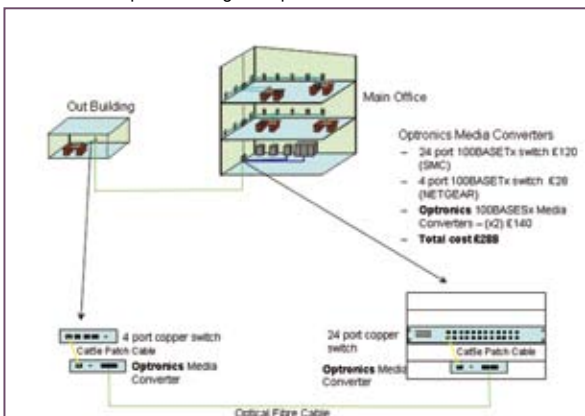

Standards	IEEE 802.3, IEEE802.3u, IEEE802.3x, 10/100BASE-Tx
Twisted Pair Connection	Two port 10/100BASE-Tx with RJ45 connector Auto negotiation for 10/100 port speed and PC/switch operation
Twisted Pair Cable	Cat 5 EIA/TIA 100ohm UTP/STP, up to 100m
Fibre Connection	Duplex Multimode SC connector , 50/125µm or 62.5/125µm Cables to 2 km Duplex Singlemode SC connector, 9/125µm cables up to 20km, 40km or 60km, 1310nm wavelength
One port 100BASE-Fx	
Data Transfer Rate	Fast Ethernet 100mbps (200mbps in full duplex)
Power Requirement	85-265VAC 50/60Hz

100BASE Tx/Fx Switched Link

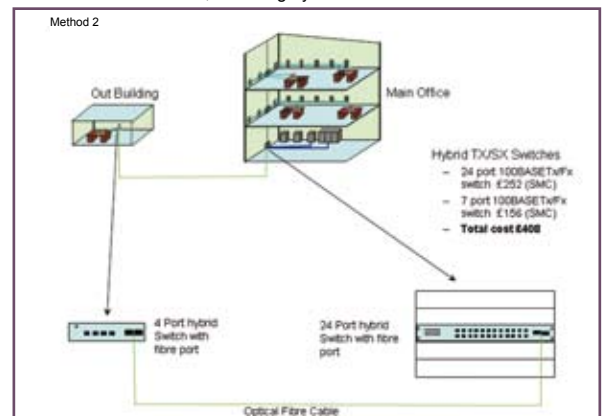

Installing fibre between two buildings using switches with a built in fibre port is very expensive and inflexible especially if you ever require expansion. Using Optronics fibre converters and standard copper switches can save you 30%. We have estimated the cost to an installer of a simple fibre link from a main building to a small outbuilding.

If an all copper 24 port switch was already in place, the savings in method 1 for the fibre link would be far greater.

Method 1. A simple link using the Optronics media converter.

Method 2. The same link, but using hybrid switches.

Connectivity

Connectors, Adapters & Attenuators

FibreFab offer a range of high performance connectors, adapters and attenuators suited for the FTTx environment. We have specifically designed the compact SC/A shuttered adapter for safe use within the home outlet.

Often in high density applications space saving becomes critical, therefore, Fibrefab have launched a range of 45° and 90° angled boots for use in these vital patching applications.

Bend Insensitive Purelight™ Pigtails

A growing need for fibre with a tighter bend radius is becoming apparent. FibreFab offer a range of pigtails and patchcords using G657.A and G657.B Fibre, which is fully compatible with standard G652 and G652.D fibre. FibreFab supply a range of patchcords that can be terminated with any connector; early deployments have indicated SC/A as the favoured connector type within the FTTx environment.

Splitters

1x2 Splitter

1x2 Splitter standard wavelength windows are centered at 1310nm and 1550nm. The FibreFab high performance Fused BiConical Taper process (FBT) bidirectional singlemode 1x2 splitters, are designed for ease of use in optical systems, to split the signal from one fibre into two output fibre lines with ultra low loss. These devices can also be used to combine two signals into one. Fabricated using the state-of-the-art FBT process the splitters operate over a wide range of wavelengths. These splitters are available in both 1x2 and 2x2 configurations. Single window and broadband 1x2 splitters are available on request.

Applications

- ▶ FTTX
- ▶ Power Splitting
- ▶ CATV Networks
- ▶ Power Monitoring
- ▶ Fibre Optic Sensors
- ▶ PON
- ▶ Fibre communication systems.

Features

- ▶ Near zero excess loss
- ▶ Low back reflection
- ▶ Thermally stable
- ▶ Low PDL
- ▶ Accurate split ratio
- ▶ All-fibre technology FBT
- ▶ Excellent uniformity
- ▶ Qualified to GR1209 and GR1221 Telecordia standards
- ▶ Available in single, dual window or broadband.

Packaging and Capability

The FibreFab range of couplers are fabricated in a world-class manufacturing facility fully equipped with clean rooms and cutting edge fabrication equipment. This facility has the capability to manufacture over 1M couplers per annum.

FibreFab splitters are available with various packaging options and a variety of connector options to meet customer requirements.

Specification

PARAMETER	UNITS	WIDEBAND (±40NM)

1 Loss of high power port/Loss of low power port.

Splitters

1x4 Splitter Monolithic Fused Splitter

FibreFab truly fused 1x4 1x2 splitters are specifically designed and optimised for Fibre to the Home (FTTH) applications. Manufactured using the state-of-the-art Fused BiConical Taper process (FBT), these splitters exhibit uniform performance over the entire optical band from 1260-1630nm with near zero excess loss. The epoxy free optical path of the FibreFab monolithic fused splitter provides good power handling capability.

Applications

- ▶ PON
- ▶ Telecommunications networks
- ▶ CATV
- ▶ Fibre test and sensor equipment.

Features

- ▶ All fibre technology
- ▶ Thermally stable
- ▶ Broadband performance
- ▶ Low back reflection
- ▶ Excellent uniformity
- ▶ Qualified to GR1209 and GR1221 Telcordia standards
- ▶ Compact packaging.

Splitters

1xN and 2xN PLC Splitters

1x32 PLC

1x8 SCA

Growth in today's broadband applications demand reliable, high performance splitters, for use within a variety of environmental conditions and packaging options. A move towards PON's within the FTTX arena calls for a device offering low insertions loss, linear uniformity and low return loss. FibreFab splitters provide excellent specifications as well as complying to, and exceeding, Telcordia GR-1221-CORE and GR-1209-CORE standard.

Features

- ▶ Designed to meet Telcordia standards
- ▶ Low IL and PDL
- ▶ Excellent uniformity
- ▶ Range of packaging options available
- ▶ High specification connectors available.

Applications

- ▶ FTTx deployments
- ▶ CATV networks
- ▶ PON's
- ▶ WAN's.

WDM

Wavelength Division Multiplexer

FibreFab high performance WDMs have been specifically designed for multiplexing two different signals into a single fibre, or splitting two signals for separate wavelengths from an incoming fibre. The FibreFab 1310/1550nm WDM can be integrated in single fibre bidirectional systems.

Applications

- ▶ FTTX
- ▶ Telecommunication Networks
- ▶ CATV Networks
- ▶ Fibre Optic T&M equipment
- ▶ Fibre Optic Sensor
- ▶ PON
- ▶ Fibre communication systems.

Features

- ▶ Near zero excess loss
- ▶ Low back reflection
- ▶ Thermally stable
- ▶ Low PDL
- ▶ All-fibre technology FBT
- ▶ Excellent uniformity
- ▶ Qualified to GR1209 and GR1221 Telcordia standards
- ▶ Compact packaging.

Packaging and Capability

The FibreFab range of couplers are fabricated in a world-class manufacturing facility fully equipped with clean rooms and cutting edge fabrication equipment. This facility has the capability to manufacture over 1M couplers per annum.

FibreFab splitters are available with various packaging options and a variety of connector options to meet customer requirements.

CWDM

8 Channel CWDM

CWDM (Course Wavelength Division Multiplexing) can use up to 18 separate channels for transmission of optical signals. The FibreFab CWDM offers the provider the opportunity of a low cost upgrade option to increase the bandwidth of the network. The CWDM can be supplied as a discrete and rack mounted solution.

Applications

- ▶ OADM
- ▶ PON
- ▶ Telecommunication network.

Features

- ▶ Telcordia approved
- ▶ Low cost
- ▶ RoHS approved.

Packaging and Capability

FibreFab splitters are available with various packaging options and a variety of connector options to meet customer requirements.

The FibreFab range of couplers are fabricated in a world-class manufacturing facility fully equipped with clean rooms and cutting edge fabrication equipment. This facility has the capability to manufacture over 1M couplers per annum.

You can find all of our telecommunication products in our FibreFab Telecommunication Catalogue. Available to download on www.FibreFab.com

Copper

Category 3

Category 3 Voice Patch Panels

OptronicPLUS CAT3 voice patch panels offer a cost effective method of introducing simple voice circuits into a structured cabling system.

These CAT3 voice panels are available in a 1U 25 port or a compact 1U 50 port option. The ports are clearly identified and both options are produced with high quality LSA style termination blocks, which are situated at a 90 degree angle to the RJ45 ports. This makes cable termination extremely quick and easy. The IDC contacts will also accept 22-26 AWG solid copper wire. Integral rear cable management relieves cable stress during and after installation.

Each panel comes complete with mini cable ties, cage nuts and earthing kit.

Features

- ▶ 19" 1U 25 port and compact 1U 50 port options
- ▶ 90 degree termination blocks
- ▶ Accepts 22-26AWG copper wire
- ▶ Provided with mini cable tie, cage nuts and earthing kit
- ▶ Integral cable management
- ▶ LSA style IDC termination blocks
- ▶ Individually numbered ports
- ▶ Designated label area

Technical Specifications

Panel Width	19" (483mm) rack mountable
Panel Depth	6.5" (163mm)
Panel Height	1U (44.5mm)
Colour	Black RAL 9005
Terminal Block	LSA IDC – 250 re-terminations Max.
Ports	RJ45 Minimum 750 insertions
Temperature Range	°C

Copper

Category 5e

Category 5e UTP Cable

OptronicsPLUS CAT5e unshielded twisted pair (UTP) LAN cable is manufactured from 24 AWG solid copper wire. Each cable is fabricated with 4 twisted pairs and each individual conductor is insulated with a colour coded polyethylene coating. The twisted pairs are covered by a grey PVC or violet Low Smoke Zero Halogen (LSZH) jacket; they also conform to the RoHS directive.

The OptronicsPLUS CAT5e UTP LAN cable is supplied in a 305m box. The boxes are convenient for transportation and are very mobile when installing. The cable is easily pulled from the box and is designed to avoid snagging. The cable jacket is metre marked allowing for quick and easy measurement and a record table is printed on every box to help installers keep track of lengths used. Our cable is tested and verified to conform to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 5e standards.

Copper

Category 5e

Category 5e UTP Patch Panels

OptronicsPLUS CAT5e UTP Patch Panels comply with the EIA/TIA standards for enhanced category 5. These patch panels have a fully sealed frame, giving extra protection to the internal circuit boards, which makes this panel very robust when compared to standard unsealed rival panels. To the front of the panel each port is numbered and has a designated label area for clear port identification.

The back of the panel consists of high quality 110 style termination blocks which accept 22-26 AWG solid copper wire. T568A and T568B wiring diagrams are printed throughout each block of 8 ports assisting a quick and easy termination. A rear cable management bar is supplied which acts as a stress reliever of terminated cables.

Each panel conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 5e standards. A choice of 19" 1U 24 port or 2U 48 port patch panels are available, both come with mini cable ties, cage nuts and rear cable management bar as standard.

Features

- ▶ Fully sealed robust frame
- ▶ Individually numbered ports
- ▶ T568A / B wiring diagrams
- ▶ Designated label area
- ▶ Rear cable management bar.
- ▶ 1U 24 ports or 2U 48 ports options available
- ▶ Conforms to Category 5e Standards
- ▶ 110 style IDC termination blocks
- ▶ Accepts 22-26AWG copper wire
- ▶ Provided with mini cable tie and cage nuts.

Technical Specifications

Category 5e

Category 5e UTP Patchcords

OptronicPLUS CAT5e unshielded twisted pair (UTP) patchcords are manufactured from 24 AWG stranded copper wire and terminated using a high grade 50U" gilded RJ45 modular plug.

Our CAT5e patch cords are available with either a PVC or Low Smoke Zero Halogen (LSZH) jacket, they also conform to the RoHS directive.

Each patch cord is individually tested to ANSI/TIA/EIA 568A-B.2.2001 category 5e standards to ensure full CAT5e performance.

Features

- ▶ Individually tested
- ▶ Conforms to ANSI/TIA/EIA 568A-B.2.2001 standards
- ▶ 24 AWG solid copper wire
- ▶ 50U" gilded RJ45 plug
- ▶ Flush moulded
- ▶ Hooded boot
- ▶ Available in 8 standard colours
- ▶ Available in 7 standard lengths
- ▶ Individually packaged.

Category 5e UTP Keystone Jacks

These keystone jacks offer versatility as they can be installed into a number of faceplates, unloaded shuttered modules as well as our unloaded 1U 24 port patch panel frame PANEL24KEYSTONE. Using these keystone jacks in the patch panel and outlet will provide you with a more balanced system and improve overall performance of the link.

For aesthetic reasons the jacks are available in black for use with the unloaded panel frame or in white for use with shutters and faceplates. Each jack conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 5e standards.

The jacks have a dual termination block which will allow the installer to terminate with either a 110 or LSA insertion tool.

Features

- ▶ Accepts 22-24 AWG copper wire
- ▶ Packed in a box of 12
- ▶ Available in black or white
- ▶ Dual termination block
- ▶ Conforms to ANSI/TIA/EIA 568A-B.2.2001 standards.
- ▶ Can be used in unloaded patch panels
- ▶ Can be used in faceplates and shutters
- ▶ Independently tested and verified
- ▶ High performance
- ▶ Compact design, ideal for high density applications.

Category 5e UTP Cable

OptronicPLUS CAT5e Foil twisted pair (FTP) LAN cable is manufactured from 24 AWG solid copper wire. Each cable is fabricated with 4 twisted pairs each individual conductor is insulated with a colour coded polyethylene coating and a quality foil shield covers all pairs. The foiled twisted pairs are covered by a grey PVC or Violet Low Smoke Zero Halogen (LSZH) jacket; they also conform to RoHs and WEE directives.

The OptronicPLUS CAT5e FTP LAN cable is supplied in a 305m box, each box offers a convenient way for transportation and is very mobile when installing. The cable is easily pulled from the box and is designed to avoid snagging of the cable. The cable jacket is metre marked allowing for quick and easy measurement and a record table is printed on every box to help installers keep track of lengths used. Our cable is tested and verified to conform to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 shielded Category 5e standards.

Category 5e STP Patch Panels

OptronicsPLUS CAT5e STP patchpanels comply with the EIA/TIA standards for enhanced category 5. These shielded patch panels feature 24 ports each individually numbered and with label space. Stress on cable caused by termination during and after installation is greatly reduced by the integral rear cable management. Each port is accompanied by a clamping plate which grants efficient grounding of the cables.

The OptronicsPlus Shielded patch panels consists of high quality LSA style termination blocks which are situated at a 90 degree angle to the RJ45 ports, this makes cable termination extremely quick and easy, the IDC contacts will also accept 22-26 AWG solid copper wire. Terminations and groundings are protected by the screw on top cover supplied as standard with each panel.

Each panel conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 5e standards. Available as a 19" 1U 24 port patch panel only it comes complete with mini cable ties, cage nuts, screw on top cover and earthing kit.

Features

- ▶ 19" 1U 24 port
- ▶ Screw on top plate
- ▶ Grounding clamps
- ▶ Designated label area
- ▶ T568A / B wiring diagrams
- ▶ Accepts 22-26AWG copper wire.
- ▶ Individually numbered ports
- ▶ Integral cable management
- ▶ 90 degree termination blocks
- ▶ LSA style IDC termination blocks
- ▶ Conforms to category 5e standards
- ▶ Provided with mini cable tie, cage nuts and earthing kit.

Unloaded 24 Port Patch Panel

Unloaded 24 Port Patch Panels

OptronicPLUS 1U unloaded 24 port patchpanel allows flexibility for the user during installations. It gives you the benefit of only using ports required by installing the desired number of jacks into the frame. It is also non category specific and allows you to install any OptronicPLUS keystone jack whether it be CAT5e or CAT6 UTP.

Each port is numbered and has a designated label area for clear port identification. When combined with an OptronicPLUS UTP keystone jack for CAT5e / CAT6 your completed panel will conform to ANSI/TIA/ EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 5e / 6 standards.

Available unloaded in a 19" 1U 24 port option, the panel comes complete with mini cable ties, cage nuts and rear cable management bar as standard.

Features

- ▶ Individually numbered ports
- ▶ Designated label area
- ▶ Unloaded 1U 24 port option
- ▶ Rear cable management bar
- ▶ For use with OptronicPLUS CAT 5e/6 jacks.
- ▶ Provided with Mini cable tie and cage nuts.

Category 6

Category 6 UTP Keystone Jack Patch Panels

OptronicsPLUS CAT6 UTP keystone jack patchpanels comply with the EIA/TIA standards for category 6. These patch panels use our CAT6 UTP shuttered keystone jacks which offers a completely balanced system when using the same jack in the wall outlet. When combined with the OptronicsPLUS CAT6 cable and modules this product will exceed Category 6 performance specifications. This product has been independently tested by 3P ensuring link performance.

To the front of the panel each port is numbered and has a designated label area for clear port identification. Each cable can be terminated to an individual keystone jack which uses a dual termination block and will accept either an LSA or a 110 insertion tool. A rear cable management bar is supplied to act as a stress reliever of terminated cables and maintain proper cable management after installation. Each keystone will accept 22-26 AWG solid copper wire. T568A and T568B wiring diagrams are printed on the back of each jack assisting a quick and easy termination. Each panel conforms to and exceeds ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 6 standards. Available fully loaded in a 19" 1U 24 port option, the panel comes complete with mini cable ties, cage nuts and rear cable management bar as standard.

Features

- ▶ Designated label area

OptronicsPLUS CAT6 UTP Printed Circuit Board (PCB) patchpanels comply with the EIA/TIA standards for Category 6. These patch panels have a fully sealed frame giving extra protection to the internal circuit boards, which makes this panel very robust when compared to standard unsealed rival panels. To the front of the panel each port is numbered and has a designated label area for clear port identification.

The back of the panel consists of high quality 110 style termination blocks which accept 22-26 AWG solid copper wire. T568A and T568B wiring diagrams are printed throughout each block of 8 ports assisting a quick and easy termination. A rear cable management bar is supplied which acts as a stress reliever of terminated cables.

Each panel conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 6 standards.

A choice of 19" 1U 24 port or 2U 48 port patch panels are available, both come with mini cable ties, cage nuts and rear cable management bar as standard.

Features

- ▶ Designated label area
- ▶ Fully sealed robust frame
- ▶ T568A / B wiring diagrams
- ▶ Individually numbered ports
- ▶ Rear cable management bar
- ▶ Conforms to and exceeds Category 6 standards.
- ▶ Provided with mini cable ties and cage nuts
- ▶ 110 style IDC termination blocks
- ▶ Conforms Category 6 standards
- ▶ Accepts 22-26AWG copper wire
- ▶ 1U 24 ports or 2U 48 ports options available

Technical Specifications

Panel Width	19" (483mm) rack mountable
Panel Depth	1.5" (40mm)
Panel Height	1U (44.5mm) 24 port, 2U (89mm) 48 Port
Colour	Black RAL 9005
Terminal Block	110 / LSA IDC – 250 re-terminations Max
Ports	RJ45 Minimum 750 insertions

Category 6 UTP Patchcords - Continuity Tested

OptronicPLUS CAT6 unshielded twisted pair (UTP) patchcords are manufactured from 24 AWG stranded copper wire and terminated using a high grade 50U" gilded RJ45 modular plug.

Our CAT6 patchcords are available with either PVC or Low Smoke Zero Halogen (LSZH) jackets, they also conform to the RoHS directive.

Each patchcord is continuity tested to ANSI/TIA/EIA 568A-B.2.2001 category 6 standards to ensure full CAT6 UTP performance when part of a channel.

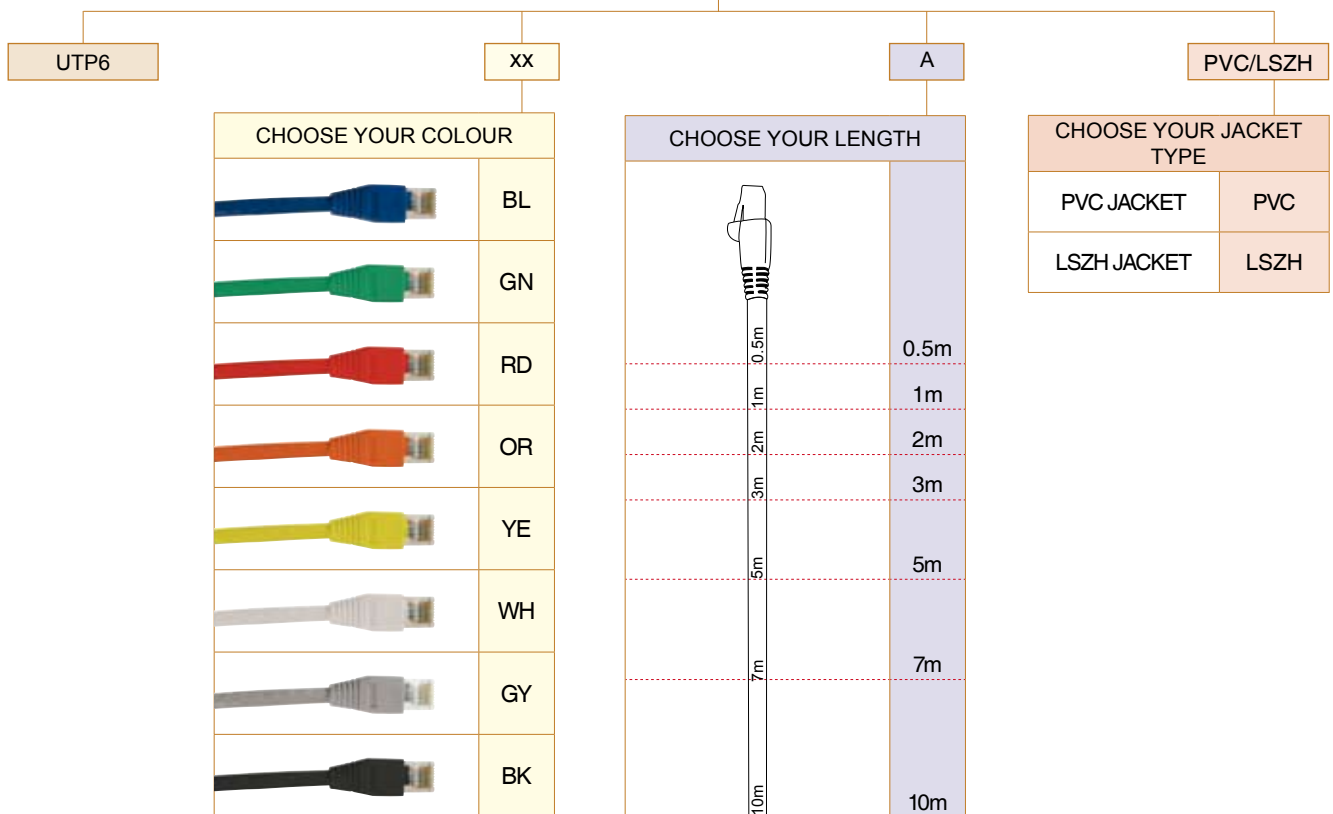

Features

- ▶ Continuity tested
- ▶ Conforms to ANSI/TIA/EIA 568A-B.2.2001 standards
- ▶ 24 AWG stranded copper wire
- ▶ 50U" gilded RJ45 plug
- ▶ Flush moulded
- ▶ Hooded boot
- ▶ Available in 8 standard colours
- ▶ Available in 7 standard lengths
- ▶ Individually packaged.

PART NUMBER GENERATOR:

UTP6 XX A - PVC
 UTP6 XX A - LSZH

= PVC Jacket example
 = LSZH Jacket Example

NB: Standard length available are 0.5m, 1m, 2m, 3m, 5m, 7m and 10m.

Non standard colour and length options are available on request. Subject to minimum order value and minimum order quantity.

Category 6

Category 6 UTP Keystone Jacks

These keystone jacks offer versatility as they can be installed into a number of faceplates, unloaded shuttered modules as well as our unloaded 1U 24 port patch panel frame PANEL24KEYSTONE, using these keystone jacks in the patch panel and outlet will provide you with a more balanced system improving overall performance of the link.

For aesthetic reasons the jacks are available in black for use with the unloaded panel frame or in white for use with shutters and faceplates. Each jack conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 6 standards.

The jacks have a dual termination block which will allow the installer to terminate with either a 110 or LSA insertion tool.

Features

- ▶ High performance
- ▶ Packed in a box of 12
- ▶ Dual termination block
- ▶ Available in black or white
- ▶ Conforms to ANSI/TIA/EIA 568A B.2.2001 standards.
- ▶ Accepts 22-24 AWG copper wire
- ▶ Independently tested and verified
- ▶ Backward compatible with CAT5e
- ▶ Can be used in unloaded patch panels
- ▶ Compact design, ideal for high density applications.

Technical Specifications

Insertion Life	Minimum 750
Termination	Dual 110 / LSA block – 250 re-terminations Max.
Contacts	8 pin Phosphor Bronze

Category 6

Category 6 UTP Angled Dual Port Faceplate

OptronicsPLUS offer a loaded dual port angled faceplate as part of the CAT6 UTP range. The faceplate features 2 ports angled at 45 degrees which improves the reduction of stress to the patchcord as well as improving the bend radius of the terminated LAN cable from within the back box. Engineered in two parts, this faceplate can firstly be terminated and attached to the back box using the screws provided, a smooth beveled frame can then be attached to cover unsightly mounting holes and screw heads. Perfect for installations where aesthetics are very important such as Hotels.

Each faceplate comes with a designated area for labelling and each port includes reversible voice or data ID tags making port identification for end users quick and easy. Each faceplate is loaded with our CAT6 UTP shuttered keystone jack. The jacks have a dual termination block which will allow the installer to terminate with either a 110 or LSA insertion tool.

Each jack conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 6 standards.

Features

- ▶ High performance
- ▶ Packed in a box of 12
- ▶ Dual termination block
- ▶ Designated label area
- ▶ Smoothed beveled frame
- ▶ Aesthetically pleasing, ideal for hotel environments
- ▶ Hides unsightly mounting holes and screw heads.
- ▶ Accepts 22-24 AWG copper wire
- ▶ Backward compatible with CAT5e
- ▶ Independently tested and verified
- ▶ Angled ports for reduced cable stress
- ▶ Includes voice or data tags
- ▶ Conforms to ANSI/TIA/EIA 568A B.2.2001 standards
- ▶ Loaded with CAT6 UTP shuttered keystone jacks.

Category 6 FTP Cable

OptronicsPLUS CAT6 foil twisted pair (FTP) LAN cable is manufactured from 24 AWG solid copper wire. Each cable is fabricated with 4 twisted pairs, each individual conductor is insulated with a colour coded polyethylene coating and a quality foil shield covers all pairs. The foiled twisted pairs are covered by a grey PVC or violet Low Smoke Zero Halogen (LSZH) jacket; they also conform to the RoHS directive.

The OptronicsPLUS CAT6 FTP LAN cable is supplied in a 305m box. The boxes are convenient for transportation and very mobile when installing. The cable is easily pulled from the box and is designed to avoid snagging. The cable jacket is metre marked allowing for quick and easy measurement and a record table is printed on every box to help installers keep track of lengths used. Our cable is tested and verified to conform to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 shielded Category 6 standards.

Features

- ▶ Conforms to category 6 standards
- ▶ Printed metre mark
- ▶ Quality foil shield
- ▶ 305m (1000ft) box
- ▶ 24 AWG solid copper wire
- ▶ RoHS compliant
- ▶ Available in PVC or LSZH jacket.

Applications

- ▶ 10 BASE T (IEEE 802.3)
- ▶ TP-PMD9ANSI (X3T9.5)
- ▶ 100 BASE T (IEE 802.3U)
- ▶ 100 MbPS CDDI
- ▶ 100 Vg-any LAN (IEEE 802.12)
- ▶ ATM 155
- ▶ TOKEN RIG (IEEE 805.5)
- ▶ 1000 BASE-TX.

Industry Standards

- ▶ UL, ETL, ANSI/TIA/EIA568
- ▶ ISO/IEC 11801:2002
- ▶ EN 50288-3-1.

Category 6 STP Patch Panels

OptronicsPLUS CAT6 STP patchpanels comply with the EIA/TIA standards for Category 6. These shielded patch panels feature 24 ports each individually numbered and with label space. Stress on cable caused by termination during and after installation is greatly reduced by the integral rear cable management. Each port is accompanied by clamping plates, which grants efficient grounding of the cables.

The OptronicsPlus shielded patch panels consists of high quality LSA style termination blocks which are situated at a 90 degree angle to the RJ45 ports, this makes cable termination extremely quick and easy, the IDC contacts will also accept 22-26 AWG solid copper wire. Terminations and groundings are protected by the screw on top cover supplied as standard with each panel.

Each panel conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 6 standards. Available as a 19" 1U 24 port patch panel only it comes complete with mini cable ties, cage nuts, screw on top cover and earthing kit.

Features

- ▶ 19" 1U 24 port
- ▶ Grounding clamps
- ▶ Designated label area
- ▶ 90 degree termination blocks
- ▶ Screw on top plate
- ▶ T568A / B wiring diagrams.
- ▶ Conforms to category 6 standards
- ▶ Accepts 22-26AWG copper wire
- ▶ LSA style IDC termination blocks
- ▶ Integral cable management
- ▶ Individually numbered ports
- ▶ Provided with mini cable tie, cage nuts and earthing kit.

Category 6

Category 6 STP Keystone Jacks

These keystone jacks are shielded with a two part case giving optimum protection from electromagnetic interference from an outside source. The rear casing is clicked into place after your FTP cable has been fed through the centre and terminated to the jack. The jack is manufactured with an integral cable strain relief. They can be installed into a number of faceplates and unloaded shuttered modules.

The jacks have a dual termination block which will allow the installer to terminate with either a 110 or LSA insertion tool. Each jack conforms to ANSI/TIA/EIA 568A-B.2.2001, ISO/IEC11801:2002 and EN50173-2 Category 6 standards.

Features

- ▶ Accepts 22-24 AWG copper wire
- ▶ Dual termination block
- ▶ High performance
- ▶ Packed in a box of 12
- ▶ Compact design, ideal for high density applications.
- ▶ Can be used in faceplates and shutters
- ▶ Backward compatible with CAT5e
- ▶ Independently tested and verified
- ▶ Two part Zinc alloy shielding
- ▶ Conforms to ANSI/TIA/EIA 568A B.2.2001 standards.

Technical Specifications

Insertion Life	Minimum 750
Termination	Dual 110 / LSA block – 250 re-terminations Max.
