GLB1111 Grade Level Box Greenbelt Applications

The GLB1111 grade level box is a high-grade blow-molded thermoplastic box for use in greenbelt applications, including broadband, telecommunications, irrigation and utilities. Superior to traditional round “flower pot” style handholes, the GLB1111 features a straight sidewall design to maximize cover load bearing capacity and minimize sidewall deflection. The GLB1111 is designed to comply with Telcordia GR-902-CORE specifications for greenway traffic environment.

Features

- Straight sidewall design for greater cover load bearing capacity and sidewall deflection
- Universal “L” bolt security system eliminates problem of lost cover bolts
- Optional private label available on cover
- “T” style overlapping cover design prevents soil from entering box when cover is removed

Specifications

Inside Dimension: 11" X 11" (279.4mm X 279.4mm)
Depth: 16" (406.4mm)
